GENERAL SERVICES ADMINISTRATION

Federal Acquisition Service
Authorized Federal Supply Schedule FSS Price List

Online access to contract ordering information, terms and conditions, pricing, and the option to create an electronic delivery order are available through GSA Advantage!®. The website for GSA Advantage!® is: https://www.GSAAdvantage.gov.

MULTIPLE AWARD SCHEDULE (MAS)
Information Technology - IT Services, IT Solutions, IT Software, IT Training
Professional Services - Training
SINs: 54151S, 518210C, 511210, 54151, 611420, 611430
FSC/PSC Code: DA01, 7A21, U012, R704, DB10

CONTRACT NUMBER: 47QTCA23D00EH

CONTRACT PERIOD: September 25, 2023 - September 24, 2028

CALIFORNIA CREATIVE SOLUTIONS, INC
13475 Danielson ST STE 230
Poway, California 92064-8859
Telephone: 858-208-4131
Website: https://ccsglobaltech.com/
Point of Contact: Hitesh Jain
Email: contracts@ccsglobaltech.com

Business Size: Other than Small Business

For more information on ordering go to the following website: https://www.gsa.gov/schedules.

Price list current as of Modification # PS-0006 effective August 19, 2024

CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross reference to item descriptions and awarded price(s).

SIN	Description
54151S	Information Technology Professional Services
518210C	Cloud Computing and Cloud Related IT Professional Services
511210	Software Licenses
54151	Software Maintenance Services
611420	Information Technology Training
611430	Professional and Management Development Training
OLM	Order-Level Materials (OLM)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. **See Price List**

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. **See Labor Category Descriptions**

2. Maximum order. **$250,000.00 (SINs 611420, OLM); $500,000.00 (SINs 54151S, 518210C, 511210, 54151); $1,000,000.00 (SIN 611430)**

3. Minimum order. **$100.00**

4. Geographic coverage (delivery area). **Domestic**

5. Point(s) of production. **US**

6. Discount from list prices or statement of net price. **Prices shown are NET Prices; Basic Discounts have been deducted.**

7. Quantity discounts. **None**

8. Prompt payment terms. **Net 30 Days. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.**

9. Foreign items. **None**

10a. Time of delivery. **30 Days ARO**

10b. Expedited Delivery. **Contact Contractor**

10c. Overnight and 2 day delivery. **Contact Contractor**

10d. Urgent Requirements. **Contact Contractor**

11. F.O.B. point(s). **Destination**

12a. Ordering address(es). **Same as contractor address**

12b. Ordering procedures: **See Federal Acquisition Regulation (FAR) 8.405-3**

13. Payment address(es). **Same as contractor address**

14. Warranty provision. **90-day**

15. Export packing charges, if applicable. **Not Applicable**

16. Terms and conditions of rental, maintenance, and repair. **Not Applicable**

17. Terms and conditions of installation. **Not Applicable**

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices. **Not Applicable**

18b. Terms and conditions for any other services. **Not Applicable**

19. List of service and distribution points. **Not Applicable**

20. List of participating dealers. **Not Applicable**

21. Preventive maintenance. **Not Applicable**

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). **Not Applicable**

22b. If applicable, indicate that Section 508 compliance information is available for the information and communications technology (ICT) products and services offered and show where full details can be found (e.g., Contractor's website or other location). ICT accessibility standards can be found at https://www.section508.gov/. **https://helm360.com/termi/**

23. Unique Entity Identifier (UEI) number. **YCGUER36ZN77**

24. Notification regarding registration in System for Award Management (SAM) database.
Registered with an expiration date of May 16, 2025

LABOR CATEGORY DESCRIPTIONS

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
Application Developer I	Under general supervision, formulates and defines system scope and objectives through research and fact-finding to develop or modify moderately complex information systems. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, documents, and maintains those programs. Competent to work on most phases of applications systems analysis and programming activities, but requires instruction and guidance in other phases.	Bachelors	2
Application Developer II	The Applications Developer II researches, analyzes, and defines user requirements, and develops systems and program specifications. This is an intermediate level professional information technology position that most often will support a large, advanced computing system.	Bachelors	4
Application Developer III	Application Developer III works with a number of programming languages and codes to provide innovative and diverse content on the Internet and mobile device; they may produce mobile apps, downloadable pieces of software available for mobile phones such as iPhone and Android.	Bachelors	6
Application Developer IV	Application Developer IV's typical responsibilities include coding, designing, application management, troubleshooting, monitoring updates and possible security threats, and providing end user support. They may also handle some project management tasks on the journey to building a new application.	Bachelors	10
Application Architect I	Assists in the design of architectures that include software, hardware, and communications solutions to support the total requirements, as well as provide for present and future cross-functional requirements and interfaces. Evaluates compatibility of information system development efforts with agency architectures and recommends appropriate adjustments. Works under the general supervision of more experienced Engineer/Architects.	Bachelors	2
Application Architect II	Establishes information requirements for large-scale information systems, databases, and/or networks. Designs architectures that include software, hardware, and communications solutions to support the total requirements, as well as provide for present and future cross-functional requirements and interfaces. Evaluates compatibility of information system development efforts with agency architectures and recommends appropriate adjustments.	Bachelors	4
Application Architect III	Establishes information requirements for large-scale information systems, databases, and/or networks. Designs architectures that include software, hardware, and communications solutions to support the total requirements, as well as provide for present and future cross-functional requirements and interfaces. Evaluates compatibility of information system development efforts with agency architectures and recommends appropriate adjustments. May provide direction and/or supervision to less experienced Engineer/Architects.	Bachelors	6
Application Architect IV	Establishes information requirements for enterprise-wide or large-scale information systems, databases, and/or networks. Designs	Bachelors	10

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	architectures that include software, hardware, and communications solutions to support the total requirements, as well as provide for present and future cross-functional requirements and interfaces. Evaluates compatibility of information system development efforts with agency architectures and recommends appropriate adjustments. May provide team leadership or consulting support on complex tasks.		
Business Analyst I	Under general supervision, formulates and defines systems scope and objectives through research and fact-finding combined with an understanding of applicable business systems and industry requirements. With this knowledge, develops or modifies moderately complex information systems. Includes analysis of business and user needs, documenting requirements, and revising existing system logic difficulties as necessary. Guides and advises less-experienced Business Systems Analysts. Competent to work in some phases of systems analysis and considers the business implications of the application of technology to the current business environment.	Bachelors	2
Business Analyst II	Provides strategic guidance and influences program direction. Recommends large scale information system solutions, and assists with business integration across organizational levels. Provides program-level guidance within area of expertise and recommends domain-specific solutions and policies. Evaluates various business models including cost-benefit analysis and return on investment (ROI).	Bachelors	4
Business Analyst III	Staff professional, expert in a specific domain with general knowledge of other domains. Provides strategic guidance and influences program direction. Recommends large scale information system solutions and policies, and assists with business integration across organizational levels. Provides program-level guidance within area of expertise and recommends domain-specific solutions and policies. Evaluates various business models including cost- benefit analysis and return on investment (ROI). May provide guidance to less experienced Business Consultants.	Bachelors	7
Business Analyst IV	Business Analyst IV is responsible for understanding and assessing the changing needs of the business. They're frequently asked to analyze the impacts of change, document and support communication between relevant groups and stakeholders, and capture requirements needed to initiate a change.	Bachelors	12
Data Analyst I	Works in a data analysis environment, which includes data design, database architecture, metadata and repository creation. Reviews data loaded into the data warehouse for accuracy. Responsible for the development, maintenance and support of an enterprise data system. Troubleshoots and tunes existing data applications. Conducts research into new data applications and determines viability for adoption. Assists in establishing development standards. Incorporates existing subject areas into an enterprise model.	Bachelors	2
Data Analyst II	Provides guidance in the use of database management systems. Designs, implements, and maintains databases with respect to access methods and time, device allocation, validation checks, file organization, indexing methods, protection and security,	Bachelors	4

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	documentation, guidelines, and statistical methods. Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary. May provide task direction to less experienced database programmers/analysts.		
Data Analyst III	Provides expertise and guidance in the use of database management systems. Designs, implements, and maintains databases with respect to access methods and time, device allocation, validation checks, file organization, indexing methods, protection and security, documentation, guidelines, and statistical methods. Establishes procedures for operations of the database and database management systems. Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary. May include experience with database systems such as MS SQL Server, DB2, Sybase, Oracle, and Informix. May function as team leader and provide direction to less experienced database programmers/analysts.	Bachelors	6
Data Analyst IV	Provides highly technical expertise and guidance in the use of database management systems. Designs, implements, and maintains databases with respect to access methods and time, device allocation, validation checks, file organization, indexing methods, protection and security, documentation, guidelines, and statistical methods. Establishes procedures for operation of the database and database management systems. Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary. May include experience with database systems such as MS SQL Server, DB2, Sybase, Oracle, and Informix. May provide team leadership or consulting support on complex database tasks.	Bachelors	8
Database Administrator I	Assists in the administration of all relational databases, database design, development, maintenance, security, and backup. Perform the daily backup and recovery procedures. Maintains detailed user/group role security models and for adding and dropping database objects, performance tuning, and performance analysis.	Bachelors	1
Database Administrator II	Supports the administration of all relational databases, database design, development, maintenance, security, and backup. Installs, configures, and maintains Oracle MS SQL Server, Oracle, DB2, Informix databases, database options, and database facilities. Facilitate the daily backup and recovery procedures. Ensures detailed user/group role security models and is primary point-of-contact for adding and dropping database objects, performance tuning, and performance analysis. Provides detailed performance reporting on a daily basis, schedule database jobs, perform disaster recovery planning and implementation, and stored procedure creation and tuning.	Bachelors	3
Database Administrator III	Database Administrator III designs, manages and maintains the company database of medium to high complexity. Evaluates and optimizes database configuration and access. Being a Database Administrator III resolves database performance and capacity issues. Performs database recovery and back-up.	Bachelors	6
Database Administrator IV	Database Administrator IV designs, manages and maintains the company database of high complexity. Evaluates and optimizes	Bachelors	9

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	database configuration and access. Being a Database Administrator IV resolves database performance and capacity issues. Performs database recovery and back-up. Additionally, Database Administrator IV advises users on access to multiple databases and helps solving data confliction and inappropriate usage. May require a bachelor's degree or its equivalent. Typically reports to manager or head of a unit/department. Database Administrator IV is a specialist on complex technical and business matters. Work is highly independent. May assume a team lead role for the work group.		
Database Architect I	Under general supervision of more experienced Architects, designs and builds relational databases. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, metadata and repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Evaluates reusability of current data for additional analyses. Reviews object and data models and the metadata repository to structure the data for better management and quicker access.	Bachelors	2
Database Architect II	Designs and builds relational databases. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, metadata and repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Evaluates reusability of current data for additional analyses. Reviews object and data models and the metadata repository to structure the data for better management and quicker access.	Bachelors	5
Database Architect III	Designs and builds relational databases. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, metadata and repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Evaluates reusability of current data for additional analyses. Reviews object and data models and the metadata repository to structure the data for better management and quicker access.	Bachelors	7
Database Architect IV	Designs and builds relational databases. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, metadata and repository creation. Translates business needs into long-term architecture solutions. Defines, designs,	Bachelors	9

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Evaluates reusability of current data for additional analyses. Reviews object and data models and the metadata repository to structure the data for better management and quicker access. Provides team leadership or consulting support on complex tasks. Coordinates with high-level stakeholders in other departments.		
Database Developer I	Specifies proper types of files organization, indexing methods and security procedures. Advises project teams on the design of complex databases. Defines specialized aspects of user's database administrator documentation. Performs detailed comparisons of various database systems. Performs duties in a complex, distributed, computing environment that may involve different types of hardware platforms, operating systems, applications and network environments. May perform analysis of, or reporting on, data or data structures. May perform extraction transformation and loading of data between databases, data sources and data warehouses. Provides expertise in data storage systems. May develop backup and archival policies and procedures and perform administrative tasks such as installing, maintaining, monitoring, recovering, rebuilding, upgrading, patching and performance tuning. May mentor co-workers.	Bachelors	3
Database Developer II	Database Developer II is responsible for data gathering before development of a database. They design, develop, test, implement and maintain new and existing databases. Database developers create management methods and systems to access efficiently to information stored in databases.	Bachelors	5
Database Developer III	Database Developer III is responsible for the performance, integrity and security of databases. They are often also involved in planning, developing and troubleshooting of databases.	Bachelors	7
Database Developer IV	Database Developer IV is responsible for performing data analysis activities to capture data requirements clearly, completely, and correctly while, at the same time, representing them in a formal and visual way through data models.	Bachelors	11
DevOps Engineer I	Under general supervision of more experienced engineers, designs, develops, codes and tests application programs using automated tools and prescribed methodology. Assists in developing software design specifications, prepares program and systems documentation and report layouts, generates program test data and tests and debugs programs. Provides input to user documentation.	Bachelors	3
DevOps Engineer II	Designs, develops, codes and tests application programs using automated tools and prescribed methodology. Assists in developing software design specifications, prepares program and systems documentation and report layouts, generates program test data and tests and debugs programs. Provides input to user documentation.	Bachelors	5
DevOps Engineer III	Designs, develops, codes and tests application programs using automated tools and prescribed methodology. Assists in developing software design specifications, prepares program and systems	Bachelors	7

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	documentation and report layouts, generates program test data and tests and debugs programs. Provides input to user documentation. Provides direction and/or supervision to less experienced engineers.		
DevOps Engineer IV	Designs, develops, codes and tests application programs using automated tools and prescribed methodology. Assists in developing software design specifications, prepares program and systems documentation and report layouts, generates program test data and tests and debugs programs. Provides input to user documentation. Provides team leadership or consulting support on complex tasks. Coordinates with high-level stakeholders in other departments.	Bachelors	9
Engineering/Network Technician I	Contributes to complete projects or studies of broad scope and complexity. Assist with the preparation of designs and specifications for various complex equipment or systems. Assist with resolution of design problems with contract personnel. Assists with Designs and coordinates test set-ups and experiments to prove or disprove the feasibility of preliminary design. Assist with the ensuring performance of the telecommunications network through constant monitoring of traffic, performance, and network configurations. Assist with corrective action to re-route traffic when problems occur and works with network engineering to resolve issues. Assists with support equipment, and installations	Bachelors	1
Engineering/Network Technician II	Install, test, service, and repair end equipment including but not limited to personal computers, network interface cards and associated software, printers, modems, fax devices, etc. Install and maintain network devices such as routers, switches, firewalls, wireless LANs, IDS/IDP appliances, etc.	Bachelors	3
Engineering/Network Technician III	Designing and installing computer networks, connections and cabling. Troubleshooting system failures and identifying roadblocks in the network. Fixing problems in LAN infrastructure and testing and configuring software. Maintaining and repairing hardware including peripheral devices.	Bachelors	7
Engineering/Network Technician IV	Prepares designs and specifications for various complex equipment or systems. Plans approach to solve design problems; conceives and recommends new design techniques; resolves design problems with contract personnel. Designs and coordinates test set-ups and experiments to prove or disprove the feasibility of preliminary design. Take corrective action to re-route traffic when problems occur and works with network engineering to resolve issues. Advise customer and contractor personnel of company requirements for products and services, support equipment, and installations. Direct regular, special, and integrated system test programs. Prepares and conducts special reports and presentations pertinent to company products and services, field operations, or other applications. Plans, prepares, and conducts on-the-job training as required in support of these activities. Perform functional consultation supporting end user groups. Applies expertise and knowledge of state-of-the-art software, hardware, network infrastructure, and/or information technology to install, configure, maintain, and troubleshoot highly complex user/system	Bachelors	9

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	problems. Prepare complex recommendations and proposals. Typically has specialization in particular software or business application. Keep abreast of technological developments and applications.		
Infrastructure Specialist	Responsibilities include administration and support of network servers Administration and support of VMware. Be able to build and maintain the entire environment from the ground up. Strong understanding of Cisco products Cisco IOS experience (switches, ASA firewalls, QoS policies, Access lists and traffic prioritization) Understanding of VLAN's. Routers and firewalls in an enterprise of various WAN scenarios such as MPLS, point-to-point and secure VPN over the internet. Hands on experience in configuration, building, installation and administration of server hardware. Demonstrated experience of virtual desktop (VDI) technology. Working knowledge of network architecture, configuration and topology. Ability to maintain documentation, create flow charts, maintenance records and reports. Ability to maintain professional working relationships with vendors contacted in the course of integrating, testing, or resolving hardware or software problems. RSA token experience, Office 365 experience, Windows Server 2012 Technologies and Active Directory, LAN/WAN, VOIP, TCP/IP, VPN/SAN/NAS/Storage. Implementation and support of Network security, VPN, firewalls, load balancers, DNS and other infrastructure components. Network Design/Architecture experience Disaster recovery and backup tools. Proficient in software and firmware patching technologies Blade server experience. Experience installing and supporting Blade server arrays. Ability to packet capture using Wireshark or TCP Dump. Administration and Experience using Network Monitoring tools.	Bachelors	5
Infrastructure Specialist – Expert	Conceptualizes, designs, constructs, tests, implements and optimizes basic infrastructure systems that enable and/or support business and/or engineering/manufacturing functions. Defines scope, plans and deliverables for assigned projects. Collects, identifies, defines and organizes detailed user requirements. Coordinates with others to ensure plans and identified solutions meet customer needs and expectations. Work products may include integrated networks, hardware and software solutions, distributed computing solutions, physical and logical communications networks, and/or monitoring of performance to enhance functionality, reliability or usability. Remains current on emerging tools, techniques, and technologies.	Bachelors	7
Network Engineer I	Under general supervision, oversees the purchase, installation, and support of network communications, including LAN/WAN systems. Works on problems of diverse scope where analysis of situation requires evaluation and judgment. Responsible for evaluating current systems. Assists in the planning of large-scale systems projects through vendor comparison and cost studies. Requires thorough knowledge of LAN/WAN systems, networks, and applications.	Bachelors	3
Network Engineer II	Oversees the purchase, installation, and support of network communications, including LAN/WAN systems. Works on problems of	Bachelors	5

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	diverse scope where analysis of situation requires evaluation and judgment. Responsible for evaluating current systems. Assists in the planning of large-scale systems projects through vendor comparison and cost studies. Requires thorough knowledge of LAN/WAN systems, networks, and applications.		
Network Engineer III	Oversees the purchase, installation, and support of network communications, including LAN/WAN systems. Works on problems of diverse scope where analysis of situation requires evaluation and judgment. Responsible for evaluating current systems. Creates plans of large-scale systems projects through vendor comparison and cost studies. Requires thorough knowledge of LAN/WAN systems, networks, and applications. Provides direction and/or supervision to less experienced engineers.	Bachelors	7
Network Engineer IV	Oversees the purchase, installation, and support of network communications, including LAN/WAN systems. Works on problems of diverse scope where analysis of situation requires evaluation and judgment. Responsible for evaluating current systems. Creates plans of large-scale systems projects through vendor comparison and cost studies. Requires thorough knowledge of LAN/WAN systems, networks, and applications. Provides team leadership or consulting support on complex tasks. Coordinates with high-level stakeholders in other departments.	Bachelors	9
Project Manager I	Simultaneously plans and directs a highly technical project (or a group of related tasks) and assists the Program Manager in working with the government Contracting Officer, the COTR, government management personnel, and client agency representatives. Under the guidance of the Program Manager, is responsible for the overall management of specific Task Orders and ensures that the technical solutions and schedules in the Task Order are implemented in a timely manner.	Bachelors	1
Project Manager II	Project Manager II manages projects from planning through delivery. Liaises between project members, cross-functional teams, external vendors, and other stakeholders to ensure deliverables, requirements, schedules, cost, and meeting plans are communicated. Being a Project Manager II utilizes appropriate tools to plan project timelines, tasks, milestones, and deadlines. Communicates schedule and changes to all stakeholders. Additionally, Project Manager II plans and facilitates project meetings to align the project team to methods and goals and to track project tasks. Prepares agendas, meeting notes, and project summaries. Monitors task completion status to Identify at risk project tasks and to develop mitigation plans. Allocates resources, budgets, and hours to the project and adjusts allocations when necessary. Typically requires a bachelor's degree or equivalent. May require a project management certification. Typically reports to a manager or head of a unit/department. The Project Manager II occasionally directed in several aspects of the work. Gaining exposure to some of the complex tasks within the job function.	Bachelors	3
Project Manager III	The Project Manager III is responsible for the management of projects within their assigned department, which includes, but is not limited	Masters	5

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	to: project scoping and budget development; project planning and scheduling; obtaining contractors; coordinating the work of multiple contractors; and monitoring work progress.		
Project Manager IV	Project Manager IV manages and oversees all aspects of a technology project to ensure it is completed on-time and within budget. Has overall responsibility for managing scope, cost, schedule, internal staffing, vendors, and contractual deliverables. Being an IT Project Manager IV develops detailed project plans.	Masters	8
Quality Assurance Analyst I	Establishes and maintains a process for evaluating software and associated documentation. Determines the resources required for quality control. Maintains the level of quality throughout the software life cycle. Reviews and verifies the preparation of quality assurance documentation and procedures. Conducts formal and informal reviews at predetermined points throughout the development life cycle. Interfaces with clients for quality assurance audits, resolution of discrepancies and other QA matters.	Bachelors	1
Quality Assurance Analyst II	Quality Assurance Analyst II evaluates, tests, and validates IT systems, services and /or software. Assesses service levels and product performance to ensure they meet established quality standards. Being an IT Quality Assurance Analyst II documents issues and tracks status in designated systems.	Bachelors	3
Quality Assurance Analyst III	Quality Analyst III evaluates products, systems, and software to ensure they are free of defects and meet the quality standards of the organization.	Bachelors	5
Quality Assurance Analyst IV	Quality Assurance Analyst IV evaluates and designs testing procedures to ensure that software meets established quality standards. Develops and writes testing scripts and plans to ensure that software functions as expected.	Bachelors	7
Quality Assurance Specialist - Expert	Quality Assurance Specialist- Expert develops quality control policies and standards for the company to follow. Training staff members on the quality control processes and policies. Overseeing quality control processes, and a team of QA specialists. Conducting in-house audits of product inventory and documentation.	Bachelors	9
Software Developer I	Software engineers design, develop, and test software and applications for computers. The main duties and responsibilities of software developer I include directing and participating in programming activities, monitoring, and evaluating system performance, and designing and implementing new programs and features.	Bachelors	3
Software Developer II	Software Engineer II designs and develops software applications. Performs coding, debugging, testing and troubleshooting throughout the application development lifecycle.	Bachelors	5
Software Developer III	Software Developer III contributes to moderately complex aspects of a project. Work is generally independent and collaborative in nature.	Bachelors	7
Software Developer IV	Software Developer IV works with developers to design algorithms and flowcharts. Produce clean, efficient code based on specifications. Integrate software components and third-party programs. Verify and	Bachelors	10

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	deploy programs and systems. Troubleshoot, debug and upgrade existing software.		
System & Network Administrator I	Under general supervision of more experienced administrators, installs, maintains, and coordinates the customer's area network. Evaluate hardware and software, including peripheral, output, and telecommunications equipment. Enforces security procedures, installs network software, and manages network performance. Troubleshoots and resolves problems. Implements and coordinates network policies, procedures, and standards.	Bachelors	1
System & Network Administrator II	Installs, maintains, and coordinates the customer's area network. Evaluate hardware and software, including peripheral, output, and telecommunications equipment. Enforces security procedures, installs network software, and manages network performance. Troubleshoots and resolves problems. Implements and coordinates network policies, procedures, and standards.	Bachelors	3
System & Network Administrator III	Installs, maintains, and coordinates the customer's area network. Evaluate hardware and software, including peripheral, output, and telecommunications equipment. Enforces security procedures, installs network software, and manages network performance. Troubleshoots and resolves problems. Implements and coordinates network policies, procedures, and standards. Provides direction and/or supervision to less experienced administrators.	Bachelors	5
System & Network Administrator IV	Installs, maintains, and coordinates the customer's area network. Evaluate hardware and software, including peripheral, output, and telecommunications equipment. Enforces security procedures, installs network software, and manages network performance. Troubleshoots and resolves problems. Implements and coordinates network policies, procedures, and standards. Provides team leadership or consulting support on complex tasks. Coordinates with high-level stakeholders in other departments.	Bachelors	7
Programmer/Systems Analyst I	Defines application problems by conferring with clients; evaluating procedures and processes. Develops solution by preparing and evaluating alternative workflow solutions. Controls solution by establishing specifications; coordinating production with programmers.	Bachelors	2
Programmer/Systems Analyst II	Systems Analyst II researches, analyzes, and designs information systems to meet the needs of an organization and that will integrate with existing and future systems. Consults with users to identify current operating procedures, problems, and requirements.	Bachelors	4
Programmer/Systems Analyst III	Analyzes and tests procedures and information systems for efficiency and effectiveness; formulates logical descriptions of problems and devises optimum solutions; designs and implements new and revised methods that effectively meet the needs of the client; and analyzes and assists in defining agency disaster recovery requirements. Also prepares charts, diagrams, tables, flowcharts, and other technical documentation regarding information technology systems and computer applications; analyzes, evaluates, and makes recommendations regarding the development of new and existing	Bachelors	7

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	procedures, standards, tools, and techniques to improve application development and maintenance; and prepares reports outlining study findings and recommendations following the Systems Development Life Cycle (SDLC) methodology.		
Programmer/Systems Analyst IV	Supervise and guide lower-level business systems analysis staff. Incumbents function as a liaison between IT and users and have both business and technical expertise. This role also requires to be a specialist on complex technical and business matters.	Bachelors	10
System Architect	System architect is in charge of devising, configuring, operating, and maintaining both computer and networking systems. They objectively analyze desired processes and outcomes and advise on the right combination of IT systems and components to achieve specific business, department, team, or functional goals.	Bachelors	10
System Architect – Senior	Conceptualizes, designs, and develops total system/product solutions for information technology and/or engineering/manufacturing processes. Translates customer and organizational objectives and critical success factors into actionable business, organization and technology strategies. Creates information technology plans based on an understanding of the customer's organization, strategic direction, technology context and business needs. Architects, designs, and develops integrated business/engineering systems and products to support achievement of the customer's goals. Controls project requirements, scope and change management issues. Assists leadership in determining tactical and strategic direction of the organization. Remains current on emerging tools, techniques, and technologies.	Masters	12
System Engineer	Reviews current systems operations. Presenting ideas for system improvements, including cost proposals. Working closely with analysts, designers and staff. Producing detailed specifications and writing the program codes. Testing the product in controlled, real situations before going live. Maintains the systems once they are up and running.	Bachelors	5
System Engineer – Senior	Performs architecture, design, and requirements analysis using systems engineering tools. Performs business rules analysis and design. Has experience with roll-out of large distributed systems and application architecture and engineering experience. Must have good communication skills and be able to lead.	Bachelors	12
Technical Writer	Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. Writes operating manuals for the non-technical end users, so that they can better understand to functions and operating standards of their software. Coordinates the display of graphics and the production of the document.	Bachelors	4
UI/UX Designer	Designs User Interfaces graphics and corresponding visual elements, define and ensures team adherence to the Project Style Guide. Conducts research of the latest trends, styles and technologies relating to graphic design to remain current. Experience with web-based scripting languages. Familiar with designing for multiple	Bachelors	8

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	browsers and platforms. Has extensive knowledge of computer equipment, scripting languages, frameworks and ability to satisfy design objectives for product users to instinctively interact with the UI with minimal supervision.		
Scrum Master	Scrum Master duties include managing timelines, resolving problems and coaching team members on Agile methodologies. Ultimately, you'll help create self-organizing teams that are flexible and fully productive during sprints.	Bachelors	6
Data Warehouse Developer I	Data warehouse developer I is responsible for handling the delivery of data and information relating to the business intelligence of the organization for which they work. They design, develop and maintain data warehouse and analytics architecture to meet an enterprise's business analysis and reporting needs.	Bachelors	3
Data Warehouse Developer II	Data warehouse developer II must have immense knowledge of BI practices, data structures, data modeling, SQL skills, analyzing and reporting techniques. On a day-to-day basis, the Data Warehouse Developer handles the delivery of data and information relating to Business Intelligence to the organization they work for.	Bachelors	6
Data Warehouse Developer III	Data warehouse Developer III builds and manages data warehouse strategies, and execute these as well. This includes setting scopes for projects, choosing the tools to use, and ensuring all data needs are being met. Furthermore, they often take on a strategic approach in order to develop appropriate solutions.	Masters	9
Data Warehouse Developer IV	Build and manage data warehouse strategies, and execute these as well. This includes setting scopes for projects, choosing the tools to use, and ensuring all data needs are being met. Furthermore, they often take on a strategic approach in order to develop appropriate solutions.	Masters	11
Training Analyst I	Provide expertise and background in the curriculum subject matter to facilitate development of training materials. Participate as a member of the curriculum development team. Will demonstrate capability to provide subject training through customer certification process prior to providing instruction to students as required. Assist with required types of training analysis in order to determine training needs, requirements, and standards. Generates training documentation throughout the training acquisition process	Bachelors	2
Training Analyst II	Provide expertise and background in the curriculum subject matter to facilitate development of training materials. Participate as a key member of the curriculum development team. Will demonstrate capability to provide subject training through customer certification process prior to providing instruction to students as required. Conduct regular reviews of instructors to ensure standardization of training. Directs/reviews training documentation and analyzes the training collective /individual tasks to identify those tasks applicable to program baseline requirements. Conducts training analysis, designs and develops training curricula, designs and develop multimedia/web storyboards and training, and measures and evaluates effectiveness of	Bachelors	4

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	training. Training analysis includes but is not limited to the conduct of needs, mission, job, task, cost, and feasibility analysis.		
Training Analyst III	Provide expertise and background in the curriculum subject matter to facilitate development of training materials. Lead curriculum development team and provides direction and oversight of the overall training requirements analysis. Perform a variety of senior level training analytical duties, Provide supervision of staff across multiple instructional courses as required. Conduct regular reviews of instructors to ensure standardization of training. Leads training analysis, designs and develops training curricula, designs and develop multimedia/web storyboards and training, and measures and evaluates effectiveness of training. Senior expert with extensive knowledge and experience developing and applying analytic methodologies and leadership for training requirements, assessing needs, developing information, and providing assistance to help define objectives, directives and methodology. Expertise in conducting competency analysis and training needs analysis, using a variety of training evaluation models. Sets the standard for training documentation review and analysis of the training collective /individual tasks to ensure that those tasks applicable to program baseline requirements are identified. Reviews the analysis of developmental designs to ensure training requirements integrity is maintained. Conduct follow-up studies of all completed training to evaluate and measure results; modify programs as needed;	Bachelors	6

Lead curriculum development team and provides direction and oversight of the overall training requirements analysis. Perform a variety of senior level training analytical duties, Provide supervision of staff across multiple instructional courses as required. Conduct regular reviews of instructors to ensure standardization of training. Leads training analysis, designs and develops training curricula, designs and develop multimedia/web storyboards and training, and measures and evaluates effectiveness of training. Senior expert with extensive knowledge and experience developing and applying analytic methodologies and leadership for training requirements, assessing needs, developing information, and providing assistance to help define objectives, directives and methodology. Expertise in conducting competency analysis and training needs analysis, using a variety of training evaluation models. Sets the standard for training documentation review and analysis of the training collective /individual tasks to ensure that those tasks applicable to program baseline requirements are identified. Reviews the analysis of developmental designs to ensure training requirements integrity is maintained. Conduct follow-up studies of all completed training to evaluate and measure results; modify programs as needed. Oversee senior training analysts and evaluate their performance.	Bachelors	8

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
Training Coordinator I	Provides administrative support to training and management personnel. Assists in collecting and organizing information required for preparation of procedural manuals, training materials, directives, guides, proposals, and other reports and deliverables in support of management, organizational and business improvement efforts. Assist with project administration, documentation planning, program management support, meeting and event planning and administration, mail services, records administration, and data input. Copying, fax, and other day-to-day administrative functions as assigned. The candidate will monitor initial training, and in concert with the customer, validate the materials prior to implementation of the final training package. Monitors instructors during lectures and laboratory demonstrations to evaluate performance	Bachelors	2
Training Coordinator II	Provides administrative support to training and management personnel. Collecting and organizing information required for preparation of procedural manuals, training materials, directives, guides, proposals, and other reports and deliverables in support of management, organizational and business improvement efforts. Assist with project administration, documentation planning, program management support, meeting and event planning and administration, mail services, records administration, and data input. Copying, fax, and other day-to-day administrative functions as assigned. Monitor initial training, and in concert with the customer, validate the materials prior to implementation of the final training package. Edits procedural manuals, training materials, directives, guides, proposals, special reports, or any other client deliverables and documents. Monitors instructors during lectures and laboratory demonstrations to evaluate performance. Work with the customer to develop baseline training requirements and from this information develop an outline of the training, coordinate with the customer and once the baseline is approved will work with the training staff to develop the course criteria, materials, and lesson plans.	Bachelors	4

Writes budget report listing training costs, such as instructors' wages and equipment costs, to justify expenditures. Attends meetings and seminars to obtain information useful to training staff and to inform management of training programs and goals. Assists developing new training program design and existing program enhancements including lesson plans and training aids. May specialize in a particular subject, training program, or function of the company, or on complex technical and business matters.	Bachelors	8
Training Specialist I	Conducts training as directed and supervised by a functional lead. Conducts research necessary to develop and revise training courses and prepares appropriate training materials. Assists in the development of all instructor materials that may include course outline, background material, and training aids. Develops all student materials that may include course workbooks, manuals, completion certificates, and course critique forms. Serves as a teaching assistant during classroom instruction. Supports training functions including the preparation of training materials, scheduling of training classes, and maintenance of the system User's Manuals for in-house and special products. Supports the development of user standard operating procedures for new software and hardware, lesson plans, handouts, reference sheets and functional hands-on training exercises.	Bachelors	5

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
Training Specialist II	Conducts training as directed by a functional lead. Conducts research necessary to develop and revise training courses and prepares appropriate training materials. Develops and reviews all student materials that may include course workbooks, manuals, completion certificates, and course critique forms. Develops all instructor materials that may include course outline, background material, and training aids. Serves as an instructor during classroom instruction. Leads planning, coordination, and execution of training programs. Leads all training functions including the preparation of training materials, scheduling of training classes, and maintenance of the system User's Manuals for in-house and special products. Leads development of user standard operating procedures for new software and hardware, lesson plans, hand-outs, reference sheets and functional hands-on training exercises. Performs interviews and surveys to analyze training needs.	Bachelors	7
Training Specialist III	Conducts training as task lead, functional lead, or individual contributor. Conducts research necessary to develop and revise training courses and prepares appropriate training materials. Develops and review all instructor materials that may include course outline, background material, and training aids. Develops and review all student materials that may include course workbooks, manuals, completion certificates, and course critique forms. Acts in a senior capacity for classroom instruction. Oversees the planning, coordination, and execution of training programs. Leads all training functions including the preparation of training materials, scheduling of training classes, and maintenance of the system User's Manuals for in-house and special products. Leads development of user standard operating procedures for new software and hardware, lesson plans, hand-outs, reference sheets and functional hands-on training exercises. Performs interviews and surveys to analyze training needs. Supervise the activity of the Training Specialist(s) and maintain contact with the customer to insure that the training meets their needs. Provides input to strategic decisions that affect the functional area of responsibility.	Masters	9
Training Specialist IV	Conducts training as task lead, functional lead, or individual contributor. Conducts research necessary to develop and revise training courses and prepares appropriate training materials. Develops and review all instructor materials that may include course outline, background material, and training aids. Develops and review all student materials that may include course workbooks, manuals, completion certificates, and course critique forms. Acts in a senior capacity for classroom instruction. Oversees the planning, coordination, and execution of training programs. 	exercises. Performs interviews and surveys to analyze training needs. Supervise the activity of the Training Specialist(s) and maintain contact with the customer to insure that the training meets their needs. Provides input to strategic decisions that affect the functional area of responsibility. Specialize in a particular subject, training program, or function of the company, or on complex technical and business matters.		
Cloud Solution Architect	Responsible for designing comprehensive cloud solutions tailored to meet specific business needs. Collaborate closely with stakeholders to understand requirements, analyze existing systems, and develop architectural designs that leverage cloud technologies effectively. Must include defining solution architecture, selecting appropriate cloud services, ensuring scalability and security, and providing guidance throughout the implementation process. Should possess expertise in cloud platforms such as AWS, Azure, or Google Cloud, and they stay updated on emerging technologies and best practices in cloud architecture.	Bachelors	5
Cloud Business Analyst	Bridge the gap between business objectives and technical capabilities within cloud initiatives. Should conduct thorough analysis of business processes, requirements, and workflows to identify opportunities for leveraging cloud technologies effectively. Responsibilities should include gathering and documenting business requirements, assessing the impact of cloud adoption on existing processes, conducting cost-benefit analysis, and providing strategic recommendations to enhance business operations through cloud solutions. Must possess strong analytical skills, business acumen, and a deep understanding of cloud technologies and their potential impact on organizational goals.	Bachelors	5
Cloud Consultant 1	Provide expert consultancy services to organizations seeking to adopt or optimize cloud solutions. Must collaborate with clients to assess their current infrastructure, understand business goals, and develop tailored cloud strategies aligned with organizational objectives. Responsible for conducting cloud readiness assessments, designing migration plans, recommending suitable cloud architectures, and providing guidance on implementation best practices. Should possess in-depth knowledge of cloud platforms, migration methodologies, and industry standards, enabling them to deliver valuable insights and solutions to clients.	Bachelors	2
Cloud Consultant 2	Specialized in providing advanced consultancy services for complex cloud projects and initiatives. Must have deep expertise in specific areas such as cloud security, governance, compliance, or optimization, guiding organizations in addressing complex challenges and maximizing the value of their cloud investments. Responsible for conducting in-depth assessments of cloud environments, developing strategic roadmaps, implementing governance frameworks, and providing mentorship to junior consultants. Should possess extensive experience in cloud technologies, coupled with specialized knowledge in their respective domain, enabling them to deliver high-impact solutions and recommendations to clients.	Bachelors	4

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
Cloud Developer 1	Responsible for designing, developing, and maintaining cloud-based applications and services. Collaborate with cross-functional teams to understand project requirements, architect scalable solutions, and implement features using cloud-native technologies and best practices. Responsible for writing clean and efficient code, integrating with cloud services and APIs, conducting unit and integration testing, and optimizing application performance for cloud environments. Possess proficiency in programming languages such as Python, Java, or JavaScript, along with hands-on experience with cloud platforms like AWS, Azure, or Google Cloud.	Masters	2
Cloud Developer 2	Specialized in designing and building highly scalable and resilient cloud-native applications. Should leverage advanced cloud technologies such as microservices architecture, containerization, and serverless computing to develop distributed systems capable of handling high loads and ensuring fault tolerance. Responsible for designing application architecture, implementing microservices, managing containerized deployments, and optimizing performance and reliability. Should possess expertise in technologies like Kubernetes, Docker, and serverless frameworks, enabling them to architect and deliver robust cloud solutions.	Masters	5
Cloud SME 1	Provide deep technical expertise and thought leadership in specific cloud technologies or platforms. Must serve as trusted advisors to teams and stakeholders, offering insights, guidance, and solutions to complex technical challenges. Should stay updated on the latest cloud trends and innovations, conducting research and experimentation, developing best practices and standards, and providing mentorship and training to colleagues. Possess a comprehensive understanding of cloud platforms, services, and architectures, combined with a passion for continuous learning and knowledge sharing.	Bachelors	4
Cloud SME 2	Possess advance knowledge and strategic insights into emerging trends and innovations in cloud computing. Should play a key role in shaping organizational strategies and roadmaps for cloud adoption and transformation initiatives. Responsible for conducting in-depth analysis of cloud technologies and market trends, evaluating potential impact on business objectives, developing long-term strategies, and providing leadership in driving cloud innovation. Must possess a deep understanding of emerging technologies such as edge computing, AI/ML, and hybrid cloud, along with strong strategic planning and communication skills.	Bachelors	5
Cloud Systems Analyst	Specialized in evaluating and optimizing cloud infrastructure and systems to ensure performance, reliability, and cost-effectiveness. Should analyze existing cloud environments, identify areas for improvement, and recommend solutions to enhance efficiency and mitigate risks. Responsible for monitoring system performance, conducting capacity planning, optimizing resource utilization, and implementing automation and orchestration tools. Possess expertise in cloud infrastructure technologies, monitoring tools, and	Bachelors	5

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	performance optimization techniques, enabling them to drive continuous improvement in cloud operations		
Cloud Tester	Should possess the understanding of quality and reliability of cloud-based applications and services through comprehensive testing strategies and methodologies. Should collaborate with development teams to define test plans, create test cases, and execute functional, performance, and security tests in cloud environments, responsible for identifying and documenting defects, performing regression testing, and providing feedback to improve software quality. Must possess expertise in testing tools and frameworks, cloud technologies, and best practices in software testing.	Bachelors	3
Cloud Program Manager	Should lead and oversee the planning, execution, and delivery of complex cloud initiatives and projects. Collaborate with stakeholders to define project scope, objectives, and deliverables, develop project plans, allocate resources, and manage budgets and timelines. Responsible for identifying and mitigating risks, resolving issues, and ensuring alignment with organizational goals and standards. Should possess strong leadership, communication, and project management skills, along with a deep understanding of cloud technologies and their impact on business operations.	Masters	5
Cloud Infrastructure Engineer	Responsible for designing, implementing, and maintaining cloud infrastructure components to support business applications and services. Collaborate with architects and developers to design scalable and resilient cloud architectures, provision and configure cloud resources, and automate deployment and management tasks. Responsible for include optimizing resource utilization, ensuring security and compliance, and troubleshooting infrastructure issues. Should possess expertise in cloud platforms, infrastructure as code, and automation tools, enabling them to build and manage robust cloud environments.	Bachelors	5
Cloud Administrator	Should manage and maintain cloud environments, ensuring their availability, performance, and security. Should configure and monitor cloud services, manage user access and permissions, and implement backup and disaster recovery procedures. Responsible include troubleshooting issues, optimizing resource utilization, and ensuring compliance with industry regulations and organizational policies. Should possess expertise in cloud platforms, networking, and security, along with strong problem-solving and communication skills.	Bachelors	7
Cloud Senior Project Manager	Responsible for leading and managing complex cloud projects and initiatives. Oversee multiple project teams, coordinate resources and activities, and ensure successful delivery within scope, budget, and timeline constraints. Responsible include defining project objectives, developing project plans, monitoring progress, and communicating with stakeholders. Possess strong leadership, negotiation, and problem-solving skills, along with a deep understanding of cloud technologies and project management methodologies.	Masters	9
Senior Cloud Database Engineer	Should design, implement, and administer cloud-based database solutions to support business applications and services. Should	Bachelors	5

Labor Category	Labor Category/Service Description	Minimum Education	Minimum Years of Experience
	collaborate with application developers and system administrators to design database architectures, optimize performance, and ensure data integrity and availability. Responsible for managing database instances, configuring replication and backup strategies, and implementing security controls. Must possess expertise in database technologies, cloud platforms, and data management practices, enabling them to design and manage scalable and reliable database solutions.		

Substitutions

Two (2) years of experience is equal to an Associate's Degree, four (4) years of experience is equal to a Bachelor's Degree, six (6) years of experience is equal to a Master's Degree, and vice versa.

TRAINING COURSE DESCRIPTIONS

All CCS training and pricing is available online at https://www.ccslearningacademy.com/course/

Course Title	Course Description
AI-102T00: Designing & Implementing An Azure AI Solution (With Exam Voucher)	AI-102 Designing and Implementing an Azure AI Solution is intended for software developers wanting to build AI infused applications that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework. The course will use C# or Python as the programming language.
AI-102T00: Designing & Implementing An Azure AI Solution (Without Exam Voucher)	AI-102 Designing and Implementing an Azure AI Solution is intended for software developers wanting to build AI infused applications that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework. The course will use C# or Python as the programming language.
AI-900T00: Microsoft Azure AI Fundamentals (With Exam Voucher)	AI-102 Designing and Implementing an Azure AI Solution is intended for software developers wanting to build AI infused applications that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework. The course will use C# or Python as the programming language.
AI-900T00: Microsoft Azure AI Fundamentals (Without Exam Voucher)	AI-102 Designing and Implementing an Azure AI Solution is intended for software developers wanting to build AI infused applications that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework. The course will use C# or Python as the programming language.
AZ-104T00-A: Microsoft Azure Administrator (With Exam Voucher)	This course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.
AZ-104T00-A: Microsoft Azure Administrator (Without Exam Voucher)	This course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.
AZ-120T00-A: Planning and Administering Microsoft Azure for SAP Workloads (With Exam Voucher)	This course teaches IT Professionals experienced in SAP solutions how to leverage Azure resources that include deployment and configuration of virtual machines, virtual networks, storage accounts, and Azure AD that includes implementing and managing hybrid identities. Students of this course will learn through concepts, scenarios, procedures, and hands-on labs how to best plan and implement migration and operation of an SAP solution on Azure. Your will receive guidance on subscriptions, create and scale virtual machines, implement storage solutions, configure virtual networking, back up and share data, connect Azure and on-premises sites, manage network traffic, implement Azure Active Directory, secure identities, and monitor your solution.
AZ-120T00-A: Planning and Administering Microsoft Azure for SAP Workloads (Without Exam Voucher)	This course teaches IT Professionals experienced in SAP solutions how to leverage Azure resources that include deployment and configuration of virtual machines, virtual networks, storage accounts, and Azure AD that includes implementing and managing hybrid identities. Students of this course will learn through concepts, scenarios, procedures, and hands-on labs how to best plan and implement migration and operation of an SAP solution on Azure. Your will receive guidance on subscriptions, create and scale virtual machines, implement storage solutions, configure virtual networking, back up and share data, connect Azure and on-premises sites, manage network traffic, implement Azure Active Directory, secure identities, and monitor your solution.
AZ-204T00-A: Developing solutions for Microsoft Azure (With Exam Voucher)	This course teaches developers how to create end-to-end solutions in Microsoft Azure. Students will learn how to implement Azure compute solutions, create Azure Functions, implement and manage web apps, develop solutions utilizing Azure storage, implement authentication and authorization, and secure their solutions by using KeyVault and Managed Identities. Students will also learn how to connect to and consume Azure services and third-party services and include event- and message-based models in their solutions. The course also covers monitoring, troubleshooting, and optimizing Azure solutions.

Course Title	Course Description
AZ-204T00-A: Developing solutions for Microsoft Azure (Without Exam Voucher)	This course teaches developers how to create end-to-end solutions in Microsoft Azure. Students will learn how to implement Azure compute solutions, create Azure Functions, implement and manage web apps, develop solutions utilizing Azure storage, implement authentication and authorization, and secure their solutions by using KeyVault and Managed Identities. Students will also learn how to connect to and consume Azure services and third-party services, and include event- and message-based models in their solutions. The course also covers monitoring, troubleshooting, and optimizing Azure solutions.
AZ-305T00: Designing Microsoft Azure Infrastructure Solutions (With Exam Voucher)	Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles.
AZ-305T00: Designing Microsoft Azure Infrastructure Solutions (Without Exam Voucher)	Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles.
AZ-400: Designing and Implementing Microsoft DevOps Solutions (With Exam Voucher)	This course provides the knowledge and skills to design and implement DevOps processes and practices. Students will learn how to plan for DevOps, use source control, scale Git for an enterprise, consolidate artifacts, design a dependency management strategy, manage secrets, implement continuous integration, implement a container build strategy, design a release strategy, set up a release management workflow, implement a deployment pattern, and optimize feedback mechanisms.
AZ-400: Designing and Implementing Microsoft DevOps Solutions (Without Exam Voucher)	This course provides the knowledge and skills to design and implement DevOps processes and practices. Students will learn how to plan for DevOps, use source control, scale Git for an enterprise, consolidate artifacts, design a dependency management strategy, manage secrets, implement continuous integration, implement a container build strategy, design a release strategy, set up a release management workflow, implement a deployment pattern, and optimize feedback mechanisms.
AZ-500T00-A: Microsoft Azure Security Technologies (With Exam Voucher)	This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications, and security operations.
AZ-500T00-A: Microsoft Azure Security Technologies (Without Exam Voucher)	This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications, and security operations.
AZ-700: Designing and Implementing Microsoft Azure Networking Solutions (With Exam Voucher)	This course covers the process of designing, implementing, and managing core Azure networking infrastructure, Hybrid Networking connections, load balancing traffic, network routing, private access to Azure services, network security and monitoring. Learn how to design and implement a secure, reliable, network infrastructure in Azure and how to establish hybrid connectivity, routing, private access to Azure services, and monitoring in Azure.
AZ-700: Designing and Implementing Microsoft Azure Networking Solutions (Without Exam Voucher)	This course covers the process of designing, implementing, and managing core Azure networking infrastructure, Hybrid Networking connections, load balancing traffic, network routing, private access to Azure services, network security and monitoring. Learn how to design and implement a secure, reliable, network infrastructure in Azure and how to establish hybrid connectivity, routing, private access to Azure services, and monitoring in Azure.
AZ-900T00-A:Microsoft Azure Fundamentals Training Certification (With Exam Voucher)	Demonstrate Your Fundamental Knowledge Of Cloud Concepts With Azure Our one-day Microsoft azure fundamentals training certification program is for everyone new to the field or veterans willing to master the essentials of Microsoft Azure. CCS Learning Academy has been in the education industry for years and is known to curate and deliver quality technology learning for individuals and groups. We help learners to upgrade their knowledge according to the present industry trends. This course will provide foundational level knowledge on cloud concepts; core Azure services; and Azure management and governance features and tools. How can Microsoft Azure Fundamentals Training Benefit Your Professional Life? Azure has enabled businesses to scale up their present profitability and performance along with data security and data protection. In fact, Microsoft Azure is a highly scalable and robust

Course Title	Course Description
	platform for deploying or developing business solutions. Most importantly, using this platform, you can easily manage applications anytime and anywhere and also have control of the hosting. The CCS Learning Academy Microsoft Azure fundamental certificate course will help you to understand the various components and also guide you to gain exposure to all the aspects of Microsoft Assure. Azure Fundamentals By Our Expert Trainers CCS Learning Academy is a subsidiary of CCS Global Tech, a Certified Minority-Owned Business based in Poway, California. Besides, our expert trainers have years of industry knowledge and have successfully delivered Azure projects to our clients. The AZ-900T00-A: Microsoft Azure Fundamentals is a one-day course and after completing this course, you will be able to: The core Azure concepts Giving a proper of the Azure services Describing its core management tools Details on network security features Learning Azure Identity Services Describing Azure cost management in detail The complete details of our Azure fundamental Training Course are mentioned in the course topics. If you have more queries regarding our course, our experts are ready to guide you. You can get in touch with us through email or by calling. Throughout the training, you get the opportunity to work on LIVE Azure projects, and after the completion of the course, you will get an experience certificate. Along with that if your performance is exceptional, we will be offering you a job in CCS Global Tech.

C)CSO – Certified Cloud Security Officer (With Exam Voucher)	Mile2's Cloud Security Officer, C)CSO, course will provide you something you will not find in other class! The Cloud is being widely adopted today for a diverse set of reasons. However, many are finding that security in the cloud is a huge challenge. The C)CSO looks to fill the gap in cloud security education and give you the skills you need to develop strong cloud security. What makes this course powerful is the pairing of knowledge from leading cloud security authorities, with practical lab exercises. You will leave the course with a solid understanding of the cloud stack having been introduced to many technologies used in the cloud. Whether you are implementing private cloud architecture or managing solutions from various vendors, this course is for you.

Course Title	Course Description
C)DFE – Certified Digital Forensic Examiner (With Exam Voucher)	The Certified Digital Forensics Examiner, C)DFE certification is designed to train Cyber Crime and Fraud Investigators. Students are taught electronic discovery and advanced investigation techniques. This course is essential to anyone encountering digital evidence while conducting an investigation.Mile2's Certified Digital Forensics Examiner training teaches the methodology for conducting a computer forensic examination. Students will learn to use forensically sound investigative techniques in order to evaluate the scene, collect and document all relevant information, interview appropriate personnel, maintain chain-of-custody, and write a findings report. Through the use of a risk-based approach, the C)DFE is able to implement and maintain cost-effective security controls that are closely aligned with both business and industry standards.
C)DRE – Certified Disaster Recovery Engineer (With Exam Voucher)	A Certified Disaster Recovery Engineer, C)DRE, is the superhero of an information System! When a business is hit by a natural disaster, cybercrime or any other disruptive tragedy, how should the organization react? What if the network infrastructure is taken down? Will the business be able to continue operations? How much will it cost if the business is down during repairs? The answer is found in the Certified Disaster Recovery Engineer certification course. Disaster recovery and business continuity planning is the process of having a professional work with a business to prepare processes, policies, and procedures to follow in the event of a disruption. The C)DRE prepares students to plan and present the latest methodologies and best practices for real-world system recovery.
C)IHE – Certified Incident Handling Engineer (With Exam Voucher)	The Certified Incident Handling Engineer course, C)IHE, is designed to help Incident Handlers, System Administrators, and Security Engineers understand how to plan, create and utilize their systems. Prevent, detect and respond to attacks through the use of hands-on labs in our exclusive Cyber Range. With this in-depth training, you will learn to develop start to finish processes for establishing your Incident Handling team, strategizing for each type of attack, recovering from attacks and much more.
C)ISRM – Certified IS Risk Manager (With Exam Voucher)	Mile2's Certified Information Systems Risk Manager, C)ISRM, course is made for IT and IS professionals who are involved with all aspects of risk management. Requests for this particular area of certification is growing fast in the employment sector. Recent high-profile breaches in both the public and private sectors have increased awareness for the need for Risk Management professionals.Mile2's C)ISRM certification exam will test your knowledge in all areas of risk management. If you would like some training and test preparation before taking the Certified Information System Risk Manager Exam we offer the C)ISRM course as both a live class and a self-study combo. First, you will learn to assess a system, then implement risk controls. Finally, you will be able to monitor and maintain risk procedures. With this training, you will be able to identify risks associated with specific industries. After course completion, you will be able to design, implement, monitor and maintain risk-based, efficient and effective IS controls. Knowledge of all of these areas will be required to pass the C)ISRM exam.
C)ISSA – Certified Information Systems Security Auditor (With Exam Voucher)	The Certified Information Systems Security Auditor, C)ISSA, course covers the skills and knowledge to assess vulnerabilities, report on compliance, and implement controls for private and public enterprises. Many organizations require an Information System Auditor's expert knowledge when it comes to identifying critical issues and providing effective auditing solutions. Through the use of a risk-based approach, the C)ISSA is able to implement and maintain cost-effective security controls that are closely aligned with both business and industry standards.
C)ISSM – Certified Information Systems Security Manager (With Exam Voucher)	Companies will lean on a Certified IS Security Manager, C)ISSM to create solutions for tomorrow's problems, today. When it comes to identifying critical issues and providing effective IS management solutions. The knowledge and course content provided in the Certified Information Systems Security Manager – C)ISSM will not only cover ISACA®'s CISM exam but will provide a measurable certification that demonstrates proficiency in the IS Management Field. The Certified Information Systems Security Manager covers the skills and knowledge to assess threat analysis and risks, Risk & incident management, Security programs and CISO roles, IS security strategy and frameworks, Audit and Risk management creation of policies, compliance and awareness, as well as DR and BCP development, deployment and maintenance.

Course Title	Course Description
C)ISSO – Certified Information Systems Security Officer (With Exam Voucher)	MILE2's C)ISSO Certification aims to ensure that the holder has a broad base of knowledge covering a large variety of INFOSEC areas to ensure that they are able to effectively run an INFOSEC team and establish a cybersecurity culture.
C)NFE – Certified Network Forensic Examiner (With Exam Voucher)	The Certified Network Forensics Examiner, C)NFE, certification was developed for a U.S. classified government agency. It's purpose is to push students with a digital and network forensic skill set to the next level. In this course you will navigate through 20+ modules of network forensic topics. The C)NFE provides practical experience through our lab exercises that simulate real-world scenarios covering investigation and recovery of data in network. Other topics include: Physical Interception Traffic Acquisition Analysis Wireless Attacks SNORT. The C)NFE focuses on centralizing and investigating logging systems as well as network devices. Take your forensics career to the next level with Mile2's Network Forensics Engineer course.
C)PEH – Certified Professional Ethical Hacker (With Exam Voucher)	To protect an information system you need to be able to see that system through the eyes of the attacker. The Certified Professional Ethical Hacker certification course is the foundational training to Mile2's line of penetration testing courses because it teaches you to think like a hacker. Therefore, you can set up dynamic defenses to prevent intrusion. First, you will learn the value of vulnerability assessments. Then, you will discover how to use those assessments to make powerful changes in an information system's security. Additionally, you will learn how malware and destructive viruses function and how to implement counter response and preventative measures when it comes to a network hack.
C)PTC- Certified Penetration Testing Consultant (With Exam Voucher)	The Certified Penetration Testing Consultant, C)PTC , course is designed for IT Security Professionals and IT Network Administrators who are interested in taking an in-depth look into specific penetration testing and techniques used against operating systems. This course will teach you the necessary skills to work with a penetration testing team, the exploitation process, and how to create a buffer overflow against programs running on Windows and Linux while subverting features such as DEP and ASLR.
C)PTE – Certified Penetration Testing Engineer (With Exam Voucher)	The C)PTE exam covers a broad base of Penetration Testing areas to ensure that applicants are able to effectively manage the Penetration Testing process.
C)SLO – Certified Security Leadership Officer (With Exam Voucher)	Mile2's Certified Security Leadership Officer course is designed for mid and upper-level managers. If you are an engineer, this course will increase your knowledge in the leading information system security teams. Plus, the C)SLO will give you an essential understanding of current security issues, best practices, and technology. With this knowledge you will then be prepared to manage the security component of an information technology project. As a Security Leadership Officer, you will be the bridge between cybersecurity and business operations.
C)SP – Certified Security Principles (With Exam Voucher)	Security Principles are your first line of defense, but often the last box is checked! The IT world never stands still! Therefore, neither can IT security. It does not matter if we are talking about the implementation of IoT devices or cloud services, security is important. According to a recent study, the top source of security incidents within a company is the current employees! Mile2 does not want you to be one of them! The Certified Security Principles, C)SP, the course is going to prepare you for security across the entire environment including understanding risk management, identity and access control, and network and data security. This is just a short list of everything that we cover within this course, which will include new technologies like IoT and cloud services. This course is intended to prepare you to become a benefit to any company that is attempting to improve its security posture! With this Security Principles certification, you will be marketable to any company, anywhere in the globe!
C)SWAE – Certified Secure Web Applications Engineer(CSWAE) (With Exam Voucher)	Secure Web Application Engineers work to design information systems that are secure on the web. Organizations and governments fall victim to internet-based attacks every day. In many cases, web attacks could be thwarted but hackers, organized criminal gangs, and foreign agents are able to exploit weaknesses in web applications. The Secure Web programmer knows how to identify, mitigate and defend against all attacks through designing and building systems that are resistant to failure. With this course you will learn how to develop web applications that aren't subject to common vulnerabilities, and how to test and validate that their applications are secure, reliable and resistant to attack.

Course Title	Course Description
CC – Certified in Cybersecurity Training (With Exam Voucher)	Things you will get to learn in our CC – Certified in Cybersecurity Training CC – Certified in Cybersecurity Training, you will learn the basics of the operating system, the internet, and networks. Also, the complete procedure about how to download and install the software. CCS Learning Academy provides the best server security training to students. Employees and entry-level professionals willing to pursue a career in cyber security. With our online course, you can: Master and learn practical skills for defeating online threats. Learn advanced hacking techniques, malware detection, cyber criminals, and more. Learn about major platforms like Windows 7, Windows 8, Windows 10, macOS, and others. We take pride in offering the best cyber security certificate for beginners. Additionally, students get to learn from live instructors experienced with the security principles of cyber security. Also, we have a unique blended approach to teaching the students. We help them to explore and learn the correct fundamentals of the course. We assure them that they become diligent professionals in the future. Is there any entry-level certification for cyber security? Yes, we have a basic cyber security course at CCS Learning Academy that comprises discovering security vulnerabilities. Our entry-level CC – Certified in Cybersecurity Training comprises of The basics of data analysis Cybers depend and detecting cyber threats formation Assurance fundamentals Basics scripting an introduction to programming Cryptography basics Basic concepts of networking System administration procedures Reviewing, legal ethics, and compliance The best cyber security certifications for beginners will have all the above-mentioned topics in their course syllabus. CCS Learning Academy, being the pioneer in the educational industry, has formed a basic level cyber security program for the students. So, they can acquire the required knowledge more efficiently and be part of the IT industry. fact, having an experience of over 25 years with our subsidiary CCS Global Tech, we ensure that the students are provided with the latest resources, LIVE instructions, Peer discussions, and assessments based on the industry requirements. Does CCS Learning Academy offer advanced CC – Certified in Cybersecurity Training? With the significant growth of businesses and Technology businesses are surprised that hackers are frequently invading the online security environment. This gives rise to a more protected environment and CCS Academy has created an outstanding advanced cyber security certificate course for all the students, learners, and professionals who want to pursue a career in cyber security. The CC – Certified in Cybersecurity Training we offer will teach you proper ways to protect your computer's operating system the data and also the networks. Each of our modules has a certain focus and it will be helpful to achieve the overall goal to develop the required computing skills to prevent the privacy of an organization or the system. After the completion of the course, we further offer cybersecurity certification which you can include in your Biodata. Things you can learn With Our cyber security foundation course Cybersecurity training teaches students to learn about procedures in order to effectively address and manage various possibilities or probabilities of hacking that a computer system can experience. The entry-level certification for cyber security makes students master and easily identify threats like cyber threats, phishing activities, and hacking of secured data. They will also master the protocols for assessing the risk level, reporting the incident and fixing the issue. Since we cover most of the topics in our online course we are ranked as the top cyber security courses amongst our students. Mentioned below are the course syllabus we cover Get a basic understanding of the operating systems: At the beginning of the course, we provide our students with a basic understanding of the major platforms and operating systems. Understanding the threat and vulnerability landscape: As part of our cyber security training courses online, you will learn details related to global tracking and hacking Infrastructures. In fact, our course syllabus also covers details related to intelligent agency capabilities. Exploring the mindset of Cybercriminals: This model covers information related to covering Malware, zero-day vulnerabilities, Phishing, exploit kits, and also a lot more related to exploring the darknet. Mastering the Windows 10 privacy issues: In this module, we recover all the foundations of operating system security and the privacy functionalities related to Windows 10. Indeed, you will find the best purchase procedures to mitigate the risk. Does CCS Learning offer the best online courses for cyber security? CCS Learning Academy has an aptly prepared syllabus on the cyber security course. The cyber security courses we offer are delicately prepared for learners who want to pursue their profession in cyber security We make sure that our students become proficient engineers, and brag about a job

Course Title	Course Description
	immediately after the course. In case your performance is exceptionally well, then you get a chance to join our 25 years IT company CCS Global tech. Through our basic to advance course on cyber security you can evidently master the basic concepts or fundamentals of the cyber security field gradually moving to the in-depth concepts of cyber security. Our course is absolutely easy to complete, and you will easily cover all aspects of cyber security through our resources. In fact, we do offer the best online courses for cyber security for our students. case you are willing to gather more information about our Cybersecurity certification course, or you want our session updates, feel free to call us, or contact us through the mail.
CCSP – Certified Cloud Security Professional (With Exam Voucher)	Fill the Millions of Cybersecurity Gaps with A Cloud Security Certification CCSP – Certified Cloud Security Professionals are in demand across all types of organizations from small to large and across various industries. They include local tech employers and Fortune 500 companies. CCS Learning Academy follows the structure and guidelines mentioned by (ISC)² for security certifications and training. With our CCSP certification training, you will get basic to advanced understanding, skill building, and abilities to enhance your class security knowledge. CCSP certification training is instructor-led classes that offers much more efficiency to students as compared to videos and online resources. You can get hands-on experience by working on LIVE projects. Also, you can gather an understanding of the industry standards and implement them on the LIVE cloud projects. Why Should IT Professionals Enroll In The CCSP Training Course? The CCSP – Certified Cloud Security Professional certification is a top-notch Cyber course that comprises cloud data security data operations, cloud application security, cloud architecture, and design, and various other intricate security-related detailing. Enrolling for the CCSP certificate will evidently make you responsible for implementing the Cloud Security architecture and design. Who Can Apply To Our CCSP – Certified Cloud Security Professional Online Training? Candidates having 5 years of cumulative paid work in IT, with 3 years specialization in information security. If you do not have that experience you can still enroll in our course, but in that case, you can become an Associate of (ISC)².CCSP – Certified Cloud Security Professional Training Outline The CCSP training is provided based on the 6 domains mentioned below. The subjects under the domains ensure complete consistency and you can easily understand the fundamentals of cloud architecture. Domain 1: Cloud Concepts, Architecture, and Design Domain 2: Cloud Data Security Domain 3: Cloud Platform and Infrastructure Security Domain 4: Cloud Application Security Domain 5: Cloud Security Operations Domain 6: Legal, Risk, and Compliance The best thing about the CCS Learning Academy CCSP – Certified Cloud Security Professional training is that we offer instructor-led classes. Therefore, you can properly understand the topics, work on LIVE projects and also prepare for the examination. What are the benefits of the CCSP Certification course? The (ISC)² CCSP certificate gives better proficiency in the Cloud Security platform. In the present world, there is a high demand for Cloud Security professionals as organizations are becoming more conscious about protecting and securing their data. Here are a few benefits of CCSP training: Easily understand the CCSP – Certified Cloud Security Professional frameworks: Enrolling in a course will enable you to understand the specific data security measures and tools from the Experts. Thereafter, the professionals can easily improvise the procedures for maintaining security in the organization they are working. Will help you to advance your career: The CCSP certificate and give you a stand-alone credential. You can also become an Independent Cloud Security consultant and help your clients. Becoming an entrepreneur and opening your own custom security solution organization is also a career option. Since there is a high demand for Cloud Security professionals you can also secure your position as a senior in the industry which will certainly increase your value. CCSP is a correspondent to various vendor-specific certificates: If you are AWS certified security professional it means you already have a vendor-specific certificate. The ccsp certificate will obviously complement your existing job profile and adds value to your resume. Considering the fact that the CCSP certificate is one of the highest Cybersecurity Workforce Studies, completing this course without a doubt will help you enjoy the perks of senior professionals. Certainly, CCS Learning Academy gives you the opportunity to train with an authorized (ISC)² instructor and expert industry professionals from the convenience of your chosen class dates and timing. Why Choose CCS Learning Academy for CCSP – Certified Cloud Security

Certified Chief Information Security Officer | CCISO (With Exam Voucher)	The CCISO Certification is an industry-leading program that recognizes the real-world experience necessary to succeed at the highest executive levels of information security. Bringing together all the components required for a C-Level positions, the CCISO program combines audit management, governance, IS controls, human capital management, strategic program development, and the financial expertise vital to leading a highly successful IS program. The job of the CISO is far too important to be learned by trial and error. Executive level management skills are not areas that should be learned on the job.Material in the CCISO Program assumes a high-level understanding of technical topics and doesn't spend much time on strictly technical information, but rather on the application of technical knowledge to an information security executive's day-to-day work. The CCISO aims to bridge the gap between the executive management knowledge that CISOs need and the technical knowledge that many sitting and aspiring CISOs have. This can be a crucial gap as a practitioner endeavors to move from mid-management to upper, executive management roles. Much of this is traditionally learned as on the job training, but the CCISO Training Program can be the key to a successful transition to the highest ranks of information security management.

Certified Incident Handler | ECIH (With Exam Voucher)	The EC-Council Certified Incident Handler (ECIH) program focuses on a structured approach for performing the incident handling and response (IH&R) process. The IH&R process includes stages like incident handling and response preparation, incident validation and prioritization, incident escalation and notification, forensic evidence gathering and analysis, incident containment, systems recovery, and incident eradication. This systematic incident handling and response process creates awareness among incident responders in knowing how to respond to various types of security incidents.Cybersecurity Professionals interested in pursuing incident handling and response as a career require comprehensive training on the IH&R concepts as well as real-world scenarios. The ECIH program includes hands-on learning delivered through iLabs, online labs within the training program.
Certified Incident Handler | ECIH (Without Exam Voucher)	The EC-Council Certified Incident Handler (ECIH) program focuses on a structured approach for performing the incident handling and response (IH&R) process. The IH&R process includes stages like incident handling and response preparation, incident validation and prioritization, incident escalation and notification, forensic evidence gathering and analysis, incident containment, systems recovery, and incident eradication. This systematic incident handling and response process creates awareness among incident responders in knowing how to respond to various types of security incidents.Cybersecurity Professionals interested in pursuing incident handling and response as a career require comprehensive training on the IH&R concepts as well as real-world scenarios. The ECIH program includes hands-on learning delivered through iLabs, online labs within the training program.
Certified Network Defender | CND (With Exam Voucher)	Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on the security education framework and work role task analysis presented by the National Infocomm Competency Framework (NICF) as well as a job-task analysis and cybersecurity education framework by the National Initiative of Cybersecurity Education (NICE). The course has also been mapped to global job roles and to the Department of Defense (DoD) job roles for system/network administrators.The program prepares network administrators how to identify what parts of an organization need to be reviewed and tested for security vulnerabilities and how to reduce, prevent, and mitigate risks in the network. CND covers the protect, detect, respond and predict approach to network security.
Certified Network Defender | CND (Without Exam Voucher)	Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. CND covers the protect, detect, respond and predict approach to network security.
Certified Penetration Testing Professional | CPENT (Without Exam Voucher)	EC-Council's Certified Penetration Tester (CPENT) program is all about the pen test and will teach you to perform in an enterprise network environment that must be attacked, exploited, evaded, and defended. If you have only been working in flat networks, CPENT's live practice range will teach you to take your skills to the next level by teaching you to pen test IoT systems, OT systems, as well as how to write your own exploits, build your own tools, conduct advanced binaries exploitation, double pivot to access hidden networks, and customization of scripts and exploits to get into the innermost segments of the network.The heart of the CPENT program is all about helping students master their pen test skills by putting them to use on our live cyber ranges. The CPENT ranges were designed to be dynamic in order to give students a real-world training program, so just as targets and technology continue to change in live networks, both the CPENT practice and exam ranges will mimic this reality as our team of engineers continues to add targets and defenses throughout the CPENT course's lifetime.CPENT Course Benefits 100% mapped with the NICE framework. 100% methodology-based penetration testing program. Blends

Course Title	Course Description
	both manual and automated penetration testing approaches. Designed with the most common penetration testing practices offered by the best service providers. Maps to all major Job Portals. Role Title: Penetration Tester and Security Analyst. Provides strong reporting writing guidance. Gives a real-world experience through an Advanced Penetration Testing Range. Provides candidates with standard Pen test for use in the field.
CGEIT: Certified in the Governance of Enterprise IT (With Exam Voucher)	By the conclusion of this course, attendees will: Learn the specific requirements for passing the CGEIT Exam and attaining a certification Review key concepts, tasks, and knowledge related to the duties of an IT governance professional which serve as the foundation of the CGEIT Exam Learn successful methods of how to evaluate exam questions and answers, including analysis and explanations Review useful, proven information on study and exam time management Complete and review a mock exam, including answers and explanations

	managing information security programs and who understand these programs' relationship to their organization's overall business goals. Our CISM certification training and CISM online course are expertly designed to prepare you for the CISM exam.
CISM: Certified Information Security Manager (Without Exam Voucher)	We offer CISM certification training and a CISM online course to prepare you for the CISM certification exam. Having a CISM certification helps experienced information security management professionals advance in their careers. The course is designed for those who have experience developing and managing information security programs and who understand these programs' relationship to their organization's overall business goals. Our CISM certification training and CISM online course are expertly designed to prepare you for the CISM exam.
CISSP Exam Preparation Course (With Exam Voucher)	Creating Specialized Career Paths In CybersecurityCertified Information Systems Security Professional (CISSP) is a program meant to educate, and train learners and professionals having an interest in cyber security and data protection. CISSP Exam Preparation Course will help you to validate your expertise in cybersecurity and also give you the right skills to advance your career.What Is CISSP CERTIFICATION?The CISSP Certification is one of the prestigious certificates offered by (ISC)², an organization leading the training and certification of cybersecurity.This CISSP Exam Preparation Course training is prepared for professionals who have worked and gained experience in at least 2 out of 8 CISSP domains.Since CISSP Certification meets the requirements of the DOD (U.S Department Of Defence) it is worth adding the CISSP-certified credential to your resume. Also, this certification complies with the popular ANSI/ISO/IEC 17024 standards.Who can enroll in the CISSP certification training course?The CISSP certification course can guide you to build a senior-level career in information security. The enrollment criteria for this course are: A minimum of 2 years of experience in networking. Basic understanding of Cyber Security, IT networks, and computers. Intermediate-level knowledge of cyber security and data protection.The CISSP Exam Preparation Course will also guide you to prepare for the professional cybersecurity examinations, and gain knowledge on the updated security tools and techniques if you are already in this profession. Also, if you are a newbie and want to get a job in cybersecurity, our instructor-led classes will help you to gather fundamental to advance skills.What Are The Benefits Of Enrolling In The CISSP Exam Preparation Course?We all understand the fact that the CISSP Course is one of the most demanded security courses in the market. The independent Information Security Certification offered by CCS Learning Academy has got a number of added benefits, mentioned below are of them:CISSP Exam Preparation Course Offers Better Career Growth:There is a 2.9 million shortage of CISSP professionals. Therefore, once you complete the course, you really know the examination procedures and criteria. By earning the certification you can evidently succeed in your career and work as an IT Security Consultant or Analyst.Educates You On The Latest Technology Updates:Keeping the organization's data secure is the primary objective of most of the company. This is the reason there is various advancement in IT security. More, data protection tools, resources, software, and procedures are getting invented day by day. But as a professional, you must have the correct knowledge to deploy them. In other words, the CISSP training course will give you astounding knowledge of security tools and techniques.This certification is globally recognized. Therefore, you get the opportunity to work from any part of the world, and for global organizations too.CISSP Exam Preparation Course SyllabusThe CISSP (Certified Information Systems Security Professional) Certification Training Course is provided based on the certification rules and regulations set by (ISC)². In addition, we mainly focus on eight domains, mentioned below: Domain 1: Security and Risk Management Domain 2: Asset Security Domain 3: Security Architecture and Engineering Domain 4: Communication and Network Security Domain 5: Identity and Access Management (IAM) Domain 6: Security Assessment and Testing Domain 7: Security Operations Domain 8: Software Development SecurityWhy to Choose CCS Learning Academy for CISSP Certification Training CourseCCS Learning Academy unlocks a broad array of exclusive tools, resources, and cybersecurity techniques for learners. Since we are present in the educational industry for over 25 years our experts have hands-on knowledge of all the IT frameworks.We will give you a broad array of exclusive resources, and guidance on the present-day IT cyber security scenario. Thus, using the instructor's advice you can easily make a mark in your professional field.In addition, here are a few points that make us stand up

CISSP Exam Preparation Course (Without Exam Voucher)	Creating Specialized Career Paths In CybersecurityCertified Information Systems Security Professional (CISSP) is a program meant to educate, and train learners and professionals having an interest in cyber security and data protection. CISSP Exam Preparation Course will help you to validate your expertise in cybersecurity and also give you the right skills to advance your career.What Is CISSP CERTIFICATION?The CISSP Certification is one of the prestigious certificates offered by (ISC)², an organization leading the training and certification of cybersecurity.This CISSP Exam Preparation Course training is prepared for professionals who have worked and gained experience in at least 2 out of 8 CISSP domains.Since CISSP Certification meets the requirements of the DOD (U.S Department Of Defence) it is worth adding the CISSP-certified credential to your resume. Also, this certification complies with the popular ANSI/ISO/IEC 17024 standards.Who can enroll in the CISSP certification training course?The CISSP certification course can guide you to build a senior-level career in information security. The enrollment criteria for this course are: A minimum of 2 years of experience in networking. Basic understanding of Cyber Security, IT networks, and computers. Intermediate-level knowledge of cyber security and data protection.The CISSP Exam Preparation Course will also guide you to prepare for the professional cybersecurity examinations, and gain knowledge on the updated security tools and techniques if you are already in this profession. Also, if you are a newbie and want to get a job in cybersecurity, our instructor-led classes will help you to gather fundamental to advance skills.What Are The Benefits Of Enrolling In The CISSP Exam Preparation Course?We all understand the fact that the CISSP Course is one of the most demanded security courses in the market. The independent Information Security Certification offered by CCS Learning Academy has got a number of added benefits, mentioned below are of them:CISSP Exam Preparation Course Offers Better Career Growth:There is a 2.9 million shortage of CISSP professionals. Therefore, once you complete the course, you really know the examination procedures and criteria. By earning the certification you can evidently succeed in your career and work as an IT Security Consultant or Analyst.Educates You On The Latest Technology Updates:Keeping the organization's data secure is the primary objective of most of the company. This is the reason there is various advancement in IT security. More, data protection tools, resources, software, and procedures are getting invented day by day. CompTIA Advanced Security Practitioner (CASP+) (With Exam Voucher)	Learn advanced security administration tools and techniques while preparing for the CASP exam (CAS-004) in this hands-on course.You have experience in the increasingly crucial field of information security, and now you're ready to take that experience to the next level. CompTIA Advanced Security Practitioner (CASP) (Exam CAS-004) is the course you will need to take if your job responsibilities include securing complex enterprise environments. In this course, you will expand on your knowledge of information security to apply more advanced principles that will keep your organization safe from the many ways it can be threatened. Today's IT climate demands individuals with demonstrable skills, and the information and activities in this course can help you develop the skill set you need to confidently perform your duties as an advanced security professional. This course is designed for IT professionals who want to acquire the technical knowledge and skills needed to conceptualize, engineer, integrate, and implement secure solutions across complex enterprise environments.This course can also benefit you if you intend to pass the CompTIA Advanced Security Practitioner (CAS-004) certification examination. What you learn and practice in this course can be a significant part of your preparation.

CompTIA Cybersecurity Analyst (CySA+) (With Exam Voucher)	Participate in The High-Stake Cyber-Security Analyst Certification CourseBy participating in our CompTIA Cybersecurity Analyst (CySA+) (CS0-002) course you will get a comprehensive approach to cybersecurity. Professionals preparing for the CYSA+ (CS0-002) certification examination can highly benefit from our instructor-led classes. They can easily perform functions like IA, and implement cybersecurity measures for the Department.This course mainly emphasizes software and application security. It also includes security automation, threat hunting, and threat intelligence analysis of softwares. Security analysts will be able to easily detect the threats, and recognize the security vulnerabilities persisting in the modern world.Therefore, in case you want to gather knowledge about cyber security or want to prepare yourself for the know more about our course.What Is the Course CYSA Certification All About?The CYSA certification is a high-stake cyber security analyst certification. It applies behavioral analytics to networks and devices. In fact, the aim is to prevent, detect and combat cybersecurity threats.Our course is absolutely updated, it is focused on providing you with the necessary skills and information in cyber security. Our course context includes detection investigation, response process, protection, and more.What Will You Learn from The Cybersecurity Analyst Certification Course?With years of expertise, our Instructors have formulated a very compact CYSA+ course training. Indeed, the course ensures individual learning and skill set upgradation. By participating in our course, you will learn:Management of threatsUsing our proactive cybersecurity management training you will be able to perform all the vulnerability management and also prepare for the examination.Compliance in assessmentAfter the completion of the course, you can apply the security concepts to the organization. You can also learn risk mitigation, and gather insights into the frameworks.Concepts of Network Environments Through our course, you will learn concepts of foundational-level knowledge on all the network environments, comprising routing, switching, hubs, and bridging.Incident Response: In domain, four incident response purpose helps organizations minimize damages and vulnerabilities. It will limit the scope of incidents, promptly restore impacted systems, and more.Learn about compliance in assessmentsIn this domain, you will learn about the importance of data provision protection. Master security concepts risk mitigation policy frameworks and controls.In any organization, there are various key pieces of information like transactions, employee management, the road to records, Data Collection, and loyalty schemes that need to be protected.Privacy is very important for every organization in order to demonstrate their loyalty toward the customers. CompTIA CYSA+ certification is worth it because an individual can easily expand the existing cyber security knowledge and by the authorized partner program you can easily become job ready.How Will I benefit After Completion of The Course?Considering the fact that the IT industry is on the rise and every single task is transferring online. The consequences of data and confidentiality breaches can be huge if organizations do not take the correct initiative for protection.Job seekers and professionals looking forward to an advanced career in the information or other Security Analysis intensive roles can enroll in CompTIA CYSA+ Certification. After the completion of the course, you can prove your skill set and get hands-on cybersecurity expertise.Mentioned below are the benefits of CYSA certification benefits:Easy to Learn:The CompTIA

Course Title	Course Description
	CYSA Training offered by CCS Learning Academy has easy-to-learn Tools and techniques, learning materials, interactive exam preparation, resources, and study guides. The complete session is instructor-led. Therefore, you can learn each and every detail of threat management, security architecture, etc.Increases the validity as a profession:CySA+ is a robust platform, candidates having the certification can easily design security integration solutions with analytic tools. The assessment tools that are included in the training can easily ensure business continuity and expose anomalies that could indicate a cyber-attack. Moreover, the certification is a benchmark to prove the knowledge of security professionals.Key to successful exam completion:The certificate focus on topics that are helpful in settings standards to easily complete the examination. In addition, the test compasses several simulation-style questions and standard multiple-choice questions that add to the difficulty.Our study guides, practice examination, assessment tools, and resources are the key to the successful completion of the CompTIA CySA+ examination.Provides you with more career pathways:CySA+ is globally recognized and professionals having this certification have high earnings. Thus, you can easily apply to Fortune 500 companies and take your career to another level.The certification will make you more marketable to employers. You will be knowledgeable about the present security breaches, and how to protect them using the updated tools and techniques.Who can participate in the CompTIA CYSA Training?There are no prescribed prerequisites for participating in the CompTIA CYSA+ training. But the user certification is intended for experience in cyber security and also getting hands-on technical knowledge on IT security analytics.Therefore, anyone interested in making a future in cyber security or becoming one of the below-mentioned positions can apply for the course: IT security Analytics. Threat intelligence analysts. Cybersecurity practitioners Members of an IT team Vulnerability analysts. Anyone opting for the CompTIA CySA+ examinationFor better success, you need to have two years of experience in computer network security Technology. Also, Foundational-level operation skills for computing environments are also required. You can have a look at our prerequisites to ensure success in the course.Why Choose CompTIA CYSA+ Training? CCS Learning Academy is the leading provider of IT certifications in the world. The CompTIA course is dedicated to helping IT professionals lead digitally connected security issues.Most importantly depending on the course subject whether it is CompTIA CYSA+, or any other security course, we are the registered partner of the association.Candidates can get the following skills from our training: Identify the Tools and techniques for collecting and analyzing and interpreting security data The instructor-led classes cover all the domains like trade management, vulnerability management, cyber incident response, and more. Complete information on the particular learning to guide you prepare for the exam.For details related to the CompTIA Cybersecurity Analyst (CySA+) course, feel free to get in touch with us. We have flexible schedules for the training, you can choose according to your comfort.

As organizations scramble to protect themselves and their customers, the ability to conduct penetration testing is an emerging skill set that is becoming ever more valuable to the organizations seeking protection and ever more lucrative for those who possess these skills. In this course, you will be introduced to some general concepts and methodologies related to pen testing, and you will work your way through a simulated pen test for a fictitious company.This course can also assist you if you are pursuing the CompTIA PenTest+ certification, as tested in exam PT0-002. The course is designed to provide content and activities that correlate to the exam objectives, and therefore can be a resource as you prepare for the examination.
CompTIA Security+ (With Exam Voucher)	This online CompTIA Security+ (SY0-601) certification training course provides the basic knowledge needed to plan, implement, and maintain information security in a vendor-neutral format. This includes risk management, host and network security, authentication and access control systems, cryptography, and organizational security. This CompTIA Security+ course maps to the CompTIA Security+ certification exam (SY0-601). Objective coverage is marked throughout the course.Our CompTIA Security+ courseware has received the CompTIA Approved Quality Content (CAQC) validation, assuring that all test objectives are covered in the training material.What is CompTIA Security+ Certification?The CompTIA Security+ certification is the minimum level of certification for all IT security positions beyond entry-level. This online CompTIA Security+ training course delivers the core knowledge required to pass the CompTIA Security+ certification exam and the skills necessary to advance to an intermediate-level security job.Participants benefit most from this course if they intend to take the CompTIA Security+ SY0-601 exam.This course supports a CompTIA certification that is a DoD Approved 8570 Baseline Certification and meets DoD 8140/8570 training requirements.
CompTIA Security+ (Without Exam Voucher)	This online CompTIA Security+ (SY0-601) certification training course provides the basic knowledge needed to plan, implement, and maintain information security in a vendor-neutral format. CSSLP – Certified Secure Software Lifecycle Professional (With Exam Voucher)	What Will You Learn From Our CSSLP Training? We are offering a 40-hour CSSLP – Certified Secure Software Lifecycle Professional to candidates, students, and professionals where they will learn all aspects of incorporating planning, designing, maintaining, and seamlessly managing software. In our instructor-led course, you will learn about a series of software methodologies required to develop completely secured softwares not prone to attacks.The CSSLP comprises a broad spectrum of topics mentioned by the common body of knowledge (CBK). There are eight domains of knowledge in the CSSLP CBK. In addition, we offer teachings based on the following eight domains: Software Security concepts Requirements related to Secure software Understanding the architecture of Secure Software Implementation Of Secure Software Testing the Secure software Managing Secure software lifecycle Deploying secure software, looking after operations Management of supply chain for secure software This certified secure software lifecycle professional training effectively guarantees complete knowledge and skills to manage risks, enabling proper development, testing, and also learning to employ tools.Finally, our objective is to train you with the updated tools and techniques. We also focus on implementing the right practices in each and every phase of software development. CSSLP course Job OutlookEmployers always look for certified professionals for authentication, and with the CSSLP certification, you will always get a senior position. The CSSLP training online certifications help employers recognize their education and give them the responsibility to implement the best practices in each of the software development lifecycles. This course can be valuable for the following professionals but is not restricted to: Security Managers Software developers Software engineers Penetration testers IT managers and directorsProfessionals holding a CSSLP certification can hold job positions like: Application security engineer Web application developer Cybersecurity engineer Application Development Manager Software quality assurance analyst There are only a few of the job roles, that you can get being a certified CSSLP. But there are various other senior positions managing information, security consultant, and senior IT security specialist that you can also apply for. What are the benefits of certified secure software lifecycle professional training? The CSSLP training which is also known as the industry's premier secure software development certification gives students various benefits. It is no doubt a proven way to build your career and work with the industry's best practices. Mentioned below are a few benefits of the CSSLP training: Gives leading application security skills: With this certification, you get the necessary authentication among security professionals. You can master all 8 domains and easily solve issues that may take days for others to detect and complete. Easily qualify for the CSSLP examination: With our instructor-led training, you get knowledge about the examination procedures and the examination question sets. Also, our assessments will help you to easily gather knowledge and skills of all the topics related to the Software lifecycle and ways to protect them. Get the all-in-one examination guide: Our course is excellent for skilling up your knowledge and also passing the examination. In Fact, the resources we provide are based on the 8 domains, and the information that is

DP-080T00: Querying Data with Microsoft Transact-SQL (Without Exam Voucher)	This course will teach you how to use Transact-SQL to query and modify data in relational databases that are hosted in Microsoft SQL Server-based database systems, including: Microsoft SQL Server, Azure SQL Database and, Azure Synapse Analytics.Topics include both querying and modifying data in relational databases that are hosted in Microsoft SQL Server-based database systems, including: Microsoft SQL Server, Azure SQL Database and, Azure Synapse Analytics.
DP-100T01-A: Designing and Implementing a Data Science Solution on Azure (With Exam Voucher)	360° Microsoft Azure data science certification CourseThe Microsoft Azure data science certification course by CCS Learning Academy comprises resources created by experienced trainers whare also industry experts. With our course, you will learn data science processes and ways to use a greater degree of automation in a seamless way.Each course topic is broken into modules so that the students find it easier to remember the core subject matter. Microsoft Data Science certification starts with an introduction to Azure Machine Learning, followed by working on Machine Learning. We help students to get familiar with the Machine learning workspace and gradually move to the complicated parts of Azure which are running experiments, training models, and more.What will you learn from our course?CCS Learning Academy can help you to level up your knowledge and expertise in Data Science. With years of experience in the IT industry, we help aspirants stay up to date on Azure trends. Our course will help you to learn: By applying for the course you will learn to prepare yourself for the Microsoft exam and Data Engineering on Microsoft Azure.Will learn operating machine learning solutions in the cloud using Azure machine learning.Learn top programming languages like python and other essential languages.Model training and deployment along with machine learning solution monitoring.You will get the complete details of the course in the course topic section. Go through it and understand the modules we are providing. We have subdivided the modules according to the lessons we are going to provide for your in-depth understanding.Knowledge required to get the Azure data science certification?A candidate opting for this course or willing to be a part of the examination needs to have some knowledge and expertise in data science. They must know Azure Machine learning and MFlow.You must also have ideas to define and prepare the development environment, perform feature engineering, develop models, and perform feature engineering.Benefits of Azure DP-100 trainingIn today's IT market, Microsoft Azure is one of the most popular cloud computing services that helps data scientists to design and implement solutions easily. CCS Learning Academy has created this self-paced course where learners can easily understand the degree of automation.Mentioned below are a few benefits of enrolling in the Azure data science certification: Certification can prove beneficial for your career:Data security helps companies in understanding multiple sources and valuable insights into data. Therefore, its protection is equally important and this is why data security courses provide bigger career prospects for developers.Provide credibility to any job position: To prove credibility you need an accurate certificate and expertise. If you are a data science aspirant then the DP-100 examination can help you to become an associate and expert. The certification can also prove your dedication and commitment to the subject and make you a better professional. This course is the best one for candidates who want to initiate their journey in data security.Validation of your skills and knowledge of data security: Microsoft Data science certification validates the skill and knowledge in machine learning and data science. It evaluates your candidature in the categories like managing resources for machine learning, running experiments, deploying machine learning solutions, implementing responsible machine learning, and much moreThe Microsoft Azure data science certification by CCS Learning Academy qualifies you for your fundamental's certification examination. Also, help you to become a qualified data scientist. Do enroll in our course if you are willing to align your skills with the azure architectural commitment.Why choose the dp100 course from

DP-203T00-A: Data Engineering on Microsoft Azure (With Exam Voucher)	In this course, the student will learn about the data engineering patterns and practices as it pertains to working with batch and real-time analytical solutions using Azure data platform technologies. Students will begin by understanding the core compute and storage technologies that are used to build an analytical solution. They will then explore how to design an analytical serving layers and focus on data engineering considerations for working with source files. The students will learn how to interactively explore data stored in files in a data lake. They will learn the various ingestion techniques that can be used to load data using the Apache Spark capability found in Azure Synapse Analytics or Azure Databricks, or how to ingest using Azure Data Factory or Azure Synapse pipelines. The students will also learn the various ways they can transform the data using the same technologies that is used to ingest data. The student will spend time on the course learning how to monitor and analyze the performance of analytical system so that they can optimize the performance of data loads, or queries that are issued against the systems. They will understand the importance of implementing security to ensure that the data is protected at rest or in transit. The student will then show how the data in an analytical system can be used to create dashboards, or build predictive models in Azure Synapse Analytics.

ISO 22301 Lead Implementer (With Exam Voucher)	ISO 22301 Lead Implementer training course enables you to develop the necessary expertise to support an organization in establishing, implementing, managing, and maintaining a Business Continuity Management System (BCMS) based on ISO 22301.
ISO 31000 Lead Risk Manager (With Exam Voucher)	The Enhanced Risk Management Certification OnlineISO 31000 is considered the enhanced risk management or improved risk management strategies.Being in the industry since 1997 we have stepped into the IT academic industry with the aim to improve the education structure of IT professionals.Our ISO 31000 courses are immensely based on the enhanced risk management criteria and we focus on continual improvement and full accountability for risks through our instructor-led classes.ISO (International School Organization For Standardisation) 31000 lead risk management training course, is focused on risk management. The course actively helps participants to scale up their competencies and support their organization to mitigate risk and make improved decisions. It also offers instant familiarity with the framework to boost performance following the guidelines mentioned in iso 31000. What Will you learn in the certified risk manager certification?CCS learning Academy has designed a certified risk managers certificate for the students and professionals interested in the scores. We have structured the course with information regarding the core elements and their effective implementation.The risk management framework, its application process, and its implementation must be carried out systematically to meet the organization's objectives.Under the guidance of our instructor, you will learn all about the selection and application of the techniques depending on varied situations.We offer core training on LIVE projects and you can complete the projects by collaborating with your classmates.In our ISO 31000 lead risk management training, you can learn: Introduction to ISO 31000 and risk management principles and guidelines Step-by-step procedure to establish and initiate the risk management framework. Risk analysis, risk evaluation, and treatment based on ISO 31000. Recording and reporting of the risks. Process of communication, timely monitoring, and review of the risks. Exam Certification based on the syllabus mentioned in the ISO 31000 syllabus.Our course covers all details to certify the ISO 31000 certification exam. Once you enroll in our course you can easily predict the incidents of unknowing attacks. In fact, you will properly know the examination guidelines, and the knowledge required for the preparation to successfully pass the examination. What are the benefits of ISO 31000 risk manager certification?The risk management specialization helps you to understand the concepts and principles involved in risk management. You will also be able to build an operational risk assessment and be able to analyze risk in a global diversified portfolio. Mentioned below are some added benefits that you can enjoy by participating in our course: Respond effectively to the viable situations that may arise in the organization. Increase the likelihood of detecting risks and mitigating them with confidence. Our Risk Management course will help you to effectively achieve your goals and objectives. Understand the established risk management process using varied frameworks and strategies Understand the foundations of risk management and successfully exercise them within the program. Get familiarity with financial instruments like Stock, foreign exchange, and more.There are no

Course Title	Course Description
	such educational requirements to participate in the course but knowledge about the following like management systems, risk management processes knowledge of the ISO/IEC 27001 standards is always helpful.ISO 31000 Lead Risk Manager examination guidelines Candidates participating in the examination must be prepared to participate in the risk management examination. Here are a few things you should know about the examination: There will be multiple choice questions of 40 marks. You need to acquire at least 26+ marks to clear the examination. In case you do not acquire passing marks you can retake the examination after a day. Candidates are eligible for a second take at no additional cost if they do not qualify. Why Choose CCS LEARNING ACADEMY For ISO 31000 Lead Risk Manager Program?CCS Learning Academy is one of the leading IT Training Institute and also a subsidiary of CCS Global Tech.Since 1997, we have been offering IT education to students and professionals interested in upskilling their knowledge.Here are a few specialties of course: Instructor-led training Updated experts prepared resources Exam updates based on the recent syllabus Practice on LIVE projects Collaboration with classmatesCandidates create a constant effort to boost their decision-making and planning when is when it comes to risk management.Our instructors are efficient and have experience in risk management. Their advice will extensively guide you into making the right decisions.In case you are looking for more solutions to the queries you have related to our ISO 31000 Lead Risk Manager program, feel free to get in touch with us.
ISO 9001 Lead Auditor (With Exam Voucher)	The ISO 9001 Lead Auditor training enables you to develop the necessary expertise to perform a Quality Management System (QMS) audit by applying widely recognized audit principles, procedures, and techniques. During this training course, you will acquire the knowledge and skills to plan and carry out internal and external audits in compliance with ISO 19011 and the certification process according to ISO/IEC 17021-1.Based on practical exercises, you will be able to master the audit techniques and become competent to manage an audit program, audit team, communication with customers, and conflict resolution.After acquiring the necessary expertise to perform this audit, you can sit for the exam and apply for a "PECB Certified ISO 9001 Lead Auditor" credential. By holding a PECB Lead Auditor Certificate, you will demonstrate that you have the capabilities and competencies to audit organizations based on best practices.
ISO 9001 Lead Implementer (With Exam Voucher)	ISO 9001 Lead Implementer training enables you to develop the necessary expertise to support an organization in establishing, implementing, managing, and maintaining a Quality Management System (QMS) based on ISO 9001. During this training course, you will also gain a thorough understanding of the best practices of Quality Management Systems and consequently improve an organization's customer satisfaction and overall performance and effectiveness.After mastering all the necessary concepts of Quality Management Systems, you can sit for the exam and apply for a "PECB Certified ISO 9001 Lead Implementer" credential. By holding a PECB Lead Implementer Certificate, you will be able to demonstrate that you have the practical knowledge and professional capabilities to implement ISO 9001 in an organization.

Microsoft Office 365 Online (With Teams)	This course is an introduction to Microsoft Office 365 with Teams in a cloud-based environment. It can be used as an orientation to the full suite of Office 365 cloud-based tools.Using the Office 365 suite of productivity apps, users can easily communicate and collaborate through Microsoft Outlook mail and Teams messaging and meeting functionality. Additionally, the Microsoft SharePoint team site provides a central storage location for accessing and modifying shared documents.This course introduces working with shared documents in the familiar Office 365 online apps–Word, PowerPoint, and Excel–as an alternative to installing the Microsoft Office desktop applications. This course also introduces several productivity apps including Yammer, Planner, and Delve that can be used in combination by teams for communication and collaboration.
Microsoft Office Access 2019: Part 1	Data is everywhere. Most job roles today involve some form of data management. Virtually everyone is affected in some way by the need to manage data. A relational database application such as Microsoft® Office Access® can help you and your organization with this task. This course is the first part of a three-course series that covers the skills needed to perform database design and development in Access. Microsoft® Office Access® 2019: Part 1 (this course): Focuses on the design and construction of an Access database —viewing, navigating, searching, and entering data in a database, as well as basic relational database design and creating simple tables, queries, forms, and reports. Microsoft® Office Access® 2019: Part 2 : Focuses on optimization of an Access database, including optimizing performance and normalizing data, data validation, usability, and advanced queries, forms, and reports. Microsoft® Office Access® 2019: Part 3 : Focuses on managing the database and supporting complex database designs , including import and export of data, using action queries to manage data, creating complex forms and reports, macros and VBA, and tools and strategies to manage, distribute, and secure a database.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Access Expert (Office 363 and Office 2019): Exam MO-500 certification.

Course Title	Course Description
Microsoft Office Access 2019: Part 2	Your training and experience using Microsoft® Office Access® has given you basic database management skills, such as creating tables, designing forms and reports, and building queries. In this course, you will expand your knowledge of relational database design; promote quality input from users; improve database efficiency and promote data integrity; and implement advanced features in tables, queries, forms, and reports. Extending your knowledge of Access will result in a robust, functional database for your users. This course is the second part of a three-course series that covers the skills needed to perform database design and development in Access 2019. Microsoft® Office Access® 2019: Part 1 : Focuses on the design and construction of an Access database —viewing, navigating, searching, and entering data in a database, as well as basic relational database design and creating simple tables, queries, forms, and reports. Microsoft® Office Access® 2019: Part 2 (this course): Focuses on optimization of an Access database, including optimizing performance and normalizing data; data validation; usability; and advanced queries, forms, and reports. Microsoft® Office Access® 2019: Part 3 : Focuses on managing the database and supporting complex database designs , including import and export of data; using action queries to manage data; creating complex forms and reports; macros and Visual Basic for Applications (VBA); and tools and strategies to manage, distribute, and secure a database.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Access Expert (Office 363 and Office 2019): Exam MO-500 certification.
Microsoft Office Access 2019: Part 3	You've covered many of the basic functions of Microsoft® Office Access®, and now you're ready to learn advanced Access features such as database management, advanced form design, packaging a database, encrypting a database, preparing a database for multiple-user access, and more. Knowledge of these features separates database professionals from casual database users or occasional designers.This course is the third part of a three-course series that covers the skills needed to perform basic database design and development in Access 2019. Microsoft ® Office Access ® 2019: Part 1 : Focuses on the design and construction of an Access database —viewing, navigating, searching, and entering data in a database, as well as basic relational database design and creating simple tables, queries, forms, and reports. Microsoft ® Office Access ® 2019: Part 2 : Focuses on optimization of an Access database, including optimizing performance and normalizing data; data validation; usability; and advanced queries, forms, and reports. Microsoft ® Office Access ® 2019: Part 3 (this course): Focuses on managing the database and supporting complex database designs , including import and export of data; using action queries to manage data; creating complex forms and reports; macros and Visual Basic for Applications (VBA); and tools and strategies to manage, distribute, and secure a database.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Access Expert (Office 363 and Office 2019): Exam MO-500 certification.
Microsoft Office Excel (2019-2016-2013): Advanced	Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Excel, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do.This course builds off of the foundational and intermediate knowledge presented in the Microsoft Office Excel: Basic and Intermediate courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates.
Microsoft Office Excel (2019-2016-2013): Basic	Organizations the world over rely on information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of

Course Title	Course Description
	that data is becoming more and more challenging. Fortunately, this is where the power of Microsoft® Office Excel can help. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision-makers in your organization steer you in the right direction. It will also make these tasks much easier for you to accomplish, and in much less time, than if you used traditional pen-and-paper methods or non-specialized software. This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation.Learn Office Excel to analyze, organize, calculate, revise, update, and present your data in the desired format easily and clearly. The Microsoft Office Excel Basic (2019-2016-2013) training familiarizes students with the different features for creating spreadsheets, providing the fundamentals upon which they can build their knowledge and skills to become experts in data manipulation.
Microsoft Office Excel (2019-2016-2013): Intermediate	Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But, Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data. In other words, when you have questions about your data, you need to know how to get Excel to provide the answers for you. And that's exactly what this course aims to help you do.This course builds upon the foundational knowledge presented in the Excel: Basic course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your understanding of organizational intelligence. The ability to analyze massive amounts of data, extract actionable information from it, and present that information to decision-makers is at the foundation of a successful organization that is able to compete at a high level.Learn Office Excel Intermediate (2019-2016-2013) to deepen your understanding of organizational intelligence by creating advanced worksheets and workbooks. The Microsoft Office Excel training classes are conducted via a hands-on approach to build learners' proficiency in advanced aspects of Excel.
Microsoft Office OneNote 2016	In our fast-paced digital world, the need to capture ideas, meeting notes, and to-do items is ever present. Microsoft® Office OneNote® 2016 provides a way for you to efficiently create and collect your notes in an electronic notebook. This course will introduce you to using OneNote notebooks to store a wide variety of content in an organized structure, access the content from anywhere, and also share it with others. Additionally, learning how OneNote and the other applications in the suite are integrated increases your productivity with Microsoft Office.
Microsoft Office Outlook 2019: Part 1	Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information amongst employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft® Office Outlook® to handle the messages and meeting invitations sent among employees.In this course, you will use Outlook to send, receive, and manage email messages, manage your contact information, schedule appointments and meetings, create tasks and notes for yourself, and customize the Outlook interface to suit your working style.This course is the first in a series of two Microsoft® Office Outlook® 2019 courses. It will provide you with the basic skills you need to start using Outlook 2019 to manage your email communications, contact information, calendar events, tasks, and notes.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification.
Microsoft Office Outlook 2019: Part 2	Every day, millions of email messages are exchanged among people within and between organizations. Email has a ubiquitous presence in the lives of many, and it's likely that email technologies will continue to evolve with the changing needs of workplaces. After all, email communication has not been replaced,

Course Title	Course Description
	or its growth slowed, as many predicted with the rise of social media and the widespread adoption of mobile technologies. Many organizations have implemented mail management systems that combine the back-end power of Microsoft® Exchange Server and the front-end intuitive user interface of Microsoft® Office Outlook® 2019.In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system.This course builds upon the foundational knowledge presented in the Microsoft ® Office Outlook® 2019: Part 1 course and will help you customize a communication system well-suited to your work style.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification.
Microsoft Office PowerPoint 2019: Part 1	It's hard to imagine a day going by without people passing along large amounts of information. With so much communication to contend with, it can be difficult to grab people's attention. But, we are often called upon to do just that. So, how do you grab and maintain an audience's focus when you're asked to present important information? By being clear, organized, and engaging. And, that is exactly what Microsoft® Office PowerPoint® 2019 can help you do. Gone are the days of flip charts or drawing on a white board to illustrate your point. Today's audiences are tech savvy, accustomed to high-impact multimedia content, and stretched for time. By learning how to use the vast array of features and functionality contained within PowerPoint 2019, you will gain the ability to organize your content, enhance it with high-impact visuals, and deliver it with a punch. In this course, you will use PowerPoint 2019 to begin creating engaging, dynamic multimedia presentations. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the PowerPoint Associate (Office 365 and Office 2019): Exam MO-300.
Microsoft Office PowerPoint 2019: Part 2	Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. And, some of these presentations include sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But Microsoft® Office PowerPoint® 2019 provides you with a variety of such tools that can help you deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all of your available time.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the PowerPoint Associate (Office 365 and Office 2019): Exam MO-300.
Microsoft Office Word 2019: Part 1	These days, most people take electronic word processing for granted. While we may still write out our grocery lists with pen and paper, we expect to use a computer to create the majority of our documents. It's impossible to avoid word-processing software in many areas of the business world. Managers, lawyers, clerks, reporters, and editors rely on this software to do their jobs. Whether you are an executive secretary or a website designer, you'll need to know the ins and outs of electronic word processing.Microsoft® Word 2019 is designed to help you move smoothly through the task of creating professional-looking documents. Its rich features and powerful tools can make your work easy, and even fun. In this course, you'll learn how to use Word 2019 to create and edit simple documents; format documents; add tables and lists; add design elements and layout options; and proof documents.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Word Associate (Office 365 and Office 2019): Exam MO-100 and Word Expert (Office 365 and Office 2019): Exam MO-101 certifications.
Microsoft Office Word 2019: Part 2	After you master the basics of creating, editing, and printing Microsoft® Word documents, you're ready to move on to tackling the more advanced features. In this course, you will work with features such as

Course Title	Course Description
	formats, styles, and templates to create professional documents with a consistent look and feel. You will add visual interest to your documents by using the tables and charts features. Quick Parts and templates provide efficiency and consistency when adding content, and long complex documents can be simplified and managed in Master Documents. Finally, you will use the mail merge feature to automate sending individual letters to customers.Creating professional-looking documents can give you and your organization a competitive edge. Implementing time-saving features such as document templates and automated mailings can help reduce expenses. Mastering these techniques will make you a valued employee in your organization.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Word Associate (Office 365 and Office 2019): Exam MO-100 and Word Expert (Office 365 and Office 2019): Exam MO-101 certifications.
Microsoft Office Word 2019: Part 3	Microsoft® Word enables you to do far more than simple word processing. Word includes advanced image manipulation tools, collaboration features, cross-referencing and linking tools, entry forms and data collection, security features, and tools to automate document production.This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Word Associate (Office 365 and Office 2019): Exam MO-100 and Word Expert (Office 365 and Office 2019): Exam MO-101 certifications.
Microsoft Project 2016: Level 1	Welcome to Microsoft Project 2016: Level 1This course is designed to familiarize you with the basic features and functions of Microsoft Project Professional 2016 so you can use it effectively and efficiently in a real-world environment.This course covers the critical knowledge and skills a project manager needs to create a project plan with Project 2016 during the planning phase of a project. In other words, if your supervisor assigns you to lead a project, this course will enable you to draft a project plan with Project 2016 and share it with your supervisor (and others) for review and approval.
Microsoft Project 2016: Level 2	Welcome to Microsoft Project 2016: Level 2This course is designed to familiarize you with the advanced features and functions of Microsoft Project Professional 2016 so that you can use it effectively and efficiently in a real-world environment.In Microsoft Project 2016: Level 1, you learned the basic features of Microsoft Project 2016 during the planning phase of a project. Microsoft Project 2016: Advanced covers the advanced knowledge and skills a project manager needs to update a project plan in Project 2016 during the execution, monitoring, and controlling phases of a project. In other words, once your project plan is approved by the project sponsor, this course will enable you to manage the project so that it is completed on time, within budget, and according to scope.
Microsoft Visio 2019: Part 1	From the earliest eras of human existence, visual images have been used to represent knowledge, data, and information. Beginning with the Paleolithic cave paintings and continuing to today's most complex computer networks, these images leverage the ability of the human brain to rapidly perceive patterns and trends from visual representations.In today's workplace, visual diagrams are an essential part of communication, from road maps to sales flows to process charts. Microsoft® Visio® provides you with an intuitive, customizable tool to easily create a professional-looking visual product by using its extensive gallery of shapes. By following the exercises in this course, you will create visually engaging diagrams, maps, and drawings, using graphical elements to make information easier to comprehend.
Microsoft Visio 2019: Part 2	Microsoft® Visio® stands out among similar applications because of its unique ability to draw a wide variety of diagrams, flowcharts, workflows, and organization structures—anything that can be represented by shapes connected by lines. Most importantly, these shapes can be rearranged and with corresponding lines remaining intact. Visio has improved over the years as features common among Microsoft® Office applications have been added. Today, Visio is well integrated with other members of the Office family as well as Microsoft's cloud-based services. This greatly enriches the sharing and publishing of Visio drawings.In Microsoft® Visio® 2019: Part 1, you learned the basic skills needed to create and modify various Visio drawings. In Microsoft® Visio® 2019: Part 2, you will learn about more advanced features—making you a more efficient and effective Visio user.
PeopleCert SCRUM Master I (With Exam Voucher)	Scrum is a framework that helps teams work together. It increases team productivity by encouraging team players to learn through experiences, self-organise, and continuously improve.IT teams use Scrum

PL-300: Microsoft Power BI Data Analyst (With Exam Voucher)	This course will discuss the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI.The course will also show how to access and process data from a range of data sources including both relational and non-relational data. This course will also explore how to implement proper security standards and policies across the Power BI spectrum including datasets and groups. The course will also discuss how to manage and deploy reports and dashboards for sharing and content distribution.
PL-300: Microsoft Power BI Data Analyst (Without Exam Voucher)	This course will discuss the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI.The course will also show how to access and process data from a range of data sources including both relational and non-relational data. This course will also explore how to implement proper security standards and policies across the Power BI spectrum including datasets and groups. The course will also discuss how to manage and deploy reports and dashboards for sharing and content distribution.
PL-600: Microsoft Power Platform Solution Architect (With Exam Voucher)	The Solution Architect is responsible for the successful design, implementation, deployment and adoption of an overall solution. The Solution Architect ensures that the solution meets the customer's needs now and in the future. In this course, students will learn about decisions a Solution Architect makes during an implementation, covering security, integrations, Power Apps architecture, Power Automate architecture, and more. This course is designed to give you an introduction to the Solution Architect role.

Course Title	Course Description
PL-600: Microsoft Power Platform Solution Architect (Without Exam Voucher)	The Solution Architect is responsible for the successful design, implementation, deployment and adoption of an overall solution. In this course, students will learn about decisions a Solution Architect makes during an implementation, covering security, integrations, Power Apps architecture, Power Automate architecture, and more. This course is designed to give you an introduction to the Solution Architect role.
PL-900T00: Microsoft Power Platform Fundamentals (With Exam Voucher)	Learn the business value and product capabilities of Microsoft Power Platform. Create simple Power Apps, connect data with Dataverse, build a Power BI Dashboard, automate processes with Power Automate, and build a chatbot with Power Virtual Agents
PL-900T00: Microsoft Power Platform Fundamentals (Without Exam Voucher)	Learn the business value and product capabilities of Microsoft Power Platform. Create simple Power Apps, connect data with Dataverse, build a Power BI Dashboard, automate processes with Power Automate, and build a chatbot with Power Virtual Agents
Six Sigma Green Belt (With Exam Voucher)	Instructor-Led Vendor: PECB Quality Management
Six Sigma Yellow Belt (With Exam Voucher)	Six Sigma Yellow Belt training enables you to learn about the fundamental principles of Six Sigma. During this training course, you will be able to understand the main problem-solving tools and techniques, and the DMAIC process.After completing this course, you can sit for the exam and apply for a "PECB Certified Six Sigma Yellow Belt" credential. A PECB Six Sigma Yellow Belt Certificate shows that you have understood the fundamental methodologies of Six Sigma.
Snowflake Advanced Training	This 3-day course covers advanced Data Movement, Performance, Security, Agile Development and Data Sharing design considerations and best practices in the Snowflake Cloud Data Platform. This advanced course will consist of lecture, demos, and labs.
Snowflake Data Analyst Training	This 2-day role specific course covers how to explore, load, visualize and extract insights from the Snowflake Cloud Data Platform. This course will consist of lecture, labs, and discussions.
Snowflake Data Engineer Training	This 3-day role-specific course covers the Snowflake key concepts, features, considerations, and best practices intended for key stakeholders who will be accessing, developing, and querying datasets for analytic tasks and building data pipelines in Snowflake. These stakeholders often are in the role of database application developers and data engineers. This course will consist of lectures, demos, labs, and discussions.
Snowflake Data Science Training	This 3-day class is ideal for Snowflake users who are interested in developing the skills and experience necessary to utilize Snowflake Data Cloud for Data Science workloads. This course will cover key concepts, features, considerations, and best practices for building out data science solutions within Snowflake.
Snowflake Fundamentals 4-Day	This 4-day course covers the fundamental concepts, design considerations, and best practices intended for key stakeholders who will be working on the Snowflake Cloud Data Platform. The course will consist of lectures, demos, and labs on a wide range of foundational topics.
SSCP – Systems Security Certified Practitioner (With Exam Voucher)	Is SSCP A Good Certification Training? Professionals who work with operational security need to protect their organization's data and critical assets. Network security engineers, security administrators, security analysts, Database administrators, and others associated with an organization's critical assets can be part of the SSCP – Systems Security Certified Practitioner Bootcamp. After the completion of the SSCP Training course, you will be able to identify and evaluate potential threats and mitigate them using the updates, tools, and techniques. During our training, the candidates are given complete theoretical knowledge about the security of the system using risk management concepts, monitoring terminology, assessment activities, and more. Also, we also train our learners by giving them hands-on experience on LIVE projects. What are the domains covered in the SSCP Training Course?To protect the organization's systems and data you will need to master the types of threats and security measures. In our SSCP – Systems Security Certified Practitioner Training Course, we try to bring to notice all information related to insider and advanced persistent threats. We offer training based on the seven domains mentioned below. Domain 1. Security Operations and Administration:This domain complies with the (ISC)² Code of Ethics, understanding security concepts and identifying security controls. The other details you will master are asset controls, chain management lifecycle, and more. Domain 2. Learning Access Controls

Course Title	Course Description
	By The SSCP – Systems Security Certified Practitioner:In the Access controls, you will learn about implementing and maintaining authentication methods, learn about trust architectures, participate in the identity management lifecycle and understand access controls for the organization. Domain 3. Risk Identification, Monitoring, and Analysis:This domain focuses on understanding the risk management process, regulatory concerns, security assessment, and security platforms, and also analyzing monitoring results. Domain 4. Incident Response and Recovery:In this domain, our students are taught all about support incident lifecycle, understanding forensic investigations, and also understanding business continuity plans. Domain 5. Cryptography Understanding For The SSCP – Systems Security Certified Practitioner:Understanding all about confidentiality, data sensitivity, and regulatory best practices. Also, in this domain, you will learn to apply cryptography concepts. Our trainers will also explain services and protocols, and understand public key infrastructure. Domain 6. Network and Communications Security:You will understand the fundamental concepts of networking, network attacks, managing network security, operating network-based devices, and also securing those devices. Domain 7. Systems and Application Security:In the last and final domain, you will learn to identify and analyze various malicious codes. Also, you will master the implementation of various end-point device security, administering mobile device management, and operating secure virtual environments. What are the Benefits of a Systems Security Certified Practitioner Certification? CCS Learning Academy has been in the IT educational industry for years, throughout the journey we have always tried to educate IT professionals and make them update themselves according to the industry standards. By enrolling in our Systems Security Certified Practitioner Certification you can enjoy the following benefits: Gain proper Insights into the security field: Mastering this course will give in-depth insights into systems operation, risk identification, and monitoring of systems and application security. In fact, SSCP is considered a practical exam by the (ISC)², thus you will learn various security aspects by working on LIVE projects. Learn about theoretical practices: To become certified SSCP you will have to MASTER the code of ethics. After the completion of this course, you will be certainly able to learn about providing competent services to the principles. Increased earning potential: Without a doubt, by completing this certification you become one of the highest-paid employees in your organization. Beyond salary increments, you have better career opportunities. Stay abreast of the latest technology updates: With a recent certification, you will come to learn about all the (ISC)² updates within the security industry. Indeed, it will help you to focus on your job role, and overcome new challenges and solutions. The SSCP course will help you to feel more confident. Besides you can move forward in your career with this advanced course. Why Choose CCS Learning Academy for SSCP – Systems Security Certified Practitioner Training? CCS Learning Academy offers instructor-led Systems Security Certified Practitioner Training, to guide you to become a better professional, and also prepare for the SSCP examination. By enrolling in our course you will receive: 5 day Certified Instructor-led training Official (ISC)² Courseware (study guide) Real-world learning activities and scenarios Support on exam rules and syllabus guidelinesTo conclude, CCS Learning Academy is a subsidiary of CCS Global Tech. We have experts who can provide you with hands-on experience and guidance on Security operations and security administration. Therefore, get started with our course to enjoy the perks of SSCP certification.

Advanced Strategic Planning Made Simple	Strategic planning is the process of defining a vision or goal for the future, then creating a plan to get there. It is vital for ensuring individuals or organizations remain viable in their field and provide direction for goal or vision achievement. This course will equip learners to be more effective strategic planners, with includes an introduction to plan terminology and a step-by-step on how to create a strategic plan. As a part of the class, learners will have the opportunity to create a strategic plan based on their current

Course Title	Course Description
	objectives. Upon completion of this course, learners will receive the necessary guidance to create a strategic plan and methods to execute its steps.
Agile Leadership and Strategy	In a shifting business environment, it's the agile and resilient organizations that have a much better chance to survive—and even to thrive. With future orientation and entrepreneurial focus, this course gives you the roadmap to seize new opportunities and bounce back even stronger from unforeseen changes.Let's build agility and resilience into your leadership repertoire and your organization's DNA. Add the ability to shift mindset and inspire behavior change. Plus, the strategies to create more flexible structures and processes that grow your organization's capability and performance.
Building a Culture of Innovation for Hybrid and Virtual Teams	The modern workplace is here! For leaders like you whose team is co-located, remote or a combination, you've got to be ready to implement the next set of actions to build a culture in which innovation, creativity and collaboration can thrive regardless of any physical boundaries separating employees. Take charge and explore what's possible for you in this course.
Business Etiquette Workshop	This course examines the basics of business etiquette: consideration forothers, personal dress/appearance, the workplace versus social situations, business meetings, proper introductions and 'the handshake', conversation skills/small talk, cultural differences affecting international business opportunities, dealing with interruptions, and proper business email and telephone etiquette. Have you ever been in a situation where: You met someone important and had no idea what to say or do? You spilled soup all over yourself at an important business event? You showed up at an important meeting under or overdressed?Let's face it: we've all had those embarrassing etiquette gaffes. Our Business Etiquette workshop will help your participants look and sound their best no matter what the situation.
Business Writing Workshop	Writing is a key method of communication for most people, and it's one that many people struggle with. Writing and communication skills have degraded with more and more people communicating through email and text messaging. Developing writing skills is still as important in the business world as creating proper documents (such as proposals, reports, and agendas), giving you that extra edge in the workplace.The Business Writing workshop will give your participants a refresher on basic writing concepts (such as spelling, grammar, and punctuation), and an overview of the most common business documents. These basic skills will provide your participants with that extra benefit in the business world that a lot of people are losing.
Certified Associate in Project Management (CAPM) (With Exam Voucher)	The CAPM shows the world that you possess the foundational knowledge and skills that project teams demand. It proves that you're ready to take on a wide range of projects too—with ways of working that include predictive project management, agile principles and business analysis. Earning your CAPM equips you with all you need to start a career in project management.
Certified Associate in Project Management (CAPM) (Without Exam Voucher)	The CAPM shows the world that you possess the foundational knowledge and skills that project teams demand. It proves that you're ready to take on a wide range of projects too—with ways of working that include predictive project management, agile principles and business analysis. Earning your CAPM equips you with all you need to start a career in project management.
Change Management	Change management at the individual, team, and organization level is the X Factor in the success (or failure) in business transformation initiatives.

Change management is the people side of business transformation. Change simply does not happen by itself. Change needs to be cohesively and proactively managed. Change management integrates the transition of people, processes and technology from the current "as-is" state to a continually unfolding future state.

Change management deeply engages staff, supervisors, managers and leadership across the organization at all levels of the organization resulting in achieving project objectives and the realization |

Course Title	Course Description
	of desired outcomes. Change management is indeed the X Factor in successful and sustainable transformation.
Change Management Strategies for Team Leaders	Does it seem like your organization is continually changing and you and your team, are trying to keep up? Are you faced with people resisting change, people not being ready for change or people being fatigued with the amount of change they are experiencing?You are not alone!It is more important than ever that organizations innovate and transform to remain competitive , remain compliant with regulations and be current with technology. With innovation comes change.In this 90-minute webinar you will learn why gaining skills in change are critical for both you as a manager and for your team. You will learn strategies to action to help people better prepare and more easily adapt to organizational change.
Coaching and Mentoring Workshop	You are in your office looking over your performance report and it happened again. Your low-performing employee failed to meet the quota this month even after you spoke with them about the importance of meeting goals. This employee has a great attitude and you know they can do better. You just do not know how to motivate them to reach the goal. Money used to work, but that has worn off. You are baffled and you know being frustrated makes matters worse. What do you do? The Coaching and Mentoring focuses on how to better coach your employees to higher performance. Coaching is a process of relationship building and setting goals. How well you coach is related directly to how well you are able to foster a great working relationship with your employees through understanding them and strategic goal setting.
Conflict Resolution	Dive into the intricacies of workplace conflict with our comprehensive course designed to equip you with a profound understanding of conflict dynamics and its potential escalation. Through this course, you'll familiarize yourself with the five predominant conflict resolution styles, discerning when each is most aptly applied. Enhance your communication prowess, mastering the art of positive information delivery through impactful face-to-face interactions. Learn timely intervention strategies, ensuring conflicts are addressed before they burgeon. By fostering trust and morale among staff during conflict situations, you'll not only create a harmonious work environment but also bolster productivity and performance. This course is tailored for those aiming to confidently manage conflicts, turning challenges into opportunities for growth and collaboration.
Critical Thinking	Feeling overwhelmed? What if you could learn a process for thinking to make better decisions and create better solutions? In this course, you'll learn and practice techniques to generate breakthrough ideas and solve your most pressing problems. You'll also discover how to ask the right questions, challenge assumptions and see others' viewpoints with clarity.You'll learn how to: Translate abstract ideas into tangible results Evaluate ideas and adjust assumptions Solve problems based on credible evidence Make dramatically better decisionsYou'll also receive: The "My Thinking Styles" assessment, which gauges your thinking style preferences A personalized development report with your individual results and areas for development AMA's Critical Thinking Model, with an action plan for implementing critical thinking and decision-making skills back at work Pre- and post-seminar assessments Tune-up materials to review what you've learned after the event A skill-enabling toolkit, downloadable from the AMA Learning Portal
Cultivating a Meaningful and Productive Mentor Relationship	Mentoring is one of the critical keys to your professional success. While it appears simple on its surface, developing an impactful mentoring relationship involves a significant amount of consideration and planning both by the mentee and the mentor.In this course, you will discover what mentoring is (and what it isn't) and how you can capitalize on this powerful partnership to become a more effective leader.You'll discover how to design a mentoring alliance that will benefit both parties while establishing clear guidelines and milestones to ensure the sharing of knowledge and building of networks with measurable outcomes.

Course Title	Course Description
Cultivating Diverse and Inclusive Teams	Unleash the Power of Diverse TeamsA study by the Institute for Corporate Productivity (i4cp) revealed that high-performing organizations place a higher premium on workforce diversity and inclusion than their lower-performing competitors. Further research indicates that work teams composed of diverse individuals produce better results.It makes sense that high-performing teams are composed of people who bring a variety of perspectives and cognitive approaches. If everyone thinks the same, you're probably missing opportunities.A truly inclusive team works well for everyone. The question is: How can a leader create a sense of true inclusion and ownership for team members?This webinar focuses on the elements required to create and lead teams of diverse individuals who are engaged, energized, and willing to give their all, improve, and achieve beyond expectations.
De-Escalation Training	This course teaches effective communication, emotion management, active listening, and de-escalation techniques for handling emotionally charged situations and fostering peaceful resolutions. • Strategic Communications • The psychology of conflict and escalation • Emotionality vs. Rationality • Effective Interpersonal Communication • Emotional Intelligence (EQ) • Recognizing and managing emotions • Active Listening and Influence • Best Practices on De-escalation • Defusing Techniques
Delivering Constructive Criticism Workshop	Delivering Constructive Criticism is one of the most challenging things for anyone. Through this workshop, your participants will gain valuable knowledge and skills that will assist them with this challenging task. When an employee commits an action that requires feedback or criticism it needs to be handled in a very specific way.Constructive Criticism if done correctly will provide great benefits to your organization. It provides the ability for management to nullify problematic behaviors and develop well-rounded and productive employees. Constructive feedback shows an employee that management cares about them and will invest time and effort into their careers.
Difficult Conversations & Conflict Management	Difficult conversations are inevitable at work and in life. A misunderstanding missed deadlines, or an upset boss or customer, all can result in a difficult conversation. While they can be unpleasant, these conversations can be less painful and produce positive results. Individuals that complete this course will learn best practices for difficult conversations, and learn how to produce better outcomes as a result
Diversity, Equity, Inclusion, & Belonging (DEI&B) An Overview	This training provides participants with the foundational knowledge and understanding of terminology and best practices related to diversity, equity, inclusion, and belonging (DEI&B) in the workplace and beyond.
Effective Accountability	This course defines true accountability and dispels myths and misnomers related to much understanding of what accountability is. It explores current concepts of accountability in the workplace, and how individuals and organizations as a whole can benefit from personal accountability, and the power of creating a culture of accountability. The course details the specific accountability skills, how to develop key performance indicators (KPIs), and time management. Individuals that complete this course will understand accountability and be empowered to experience the benefits of individual and organizational accountability.
Effective Communication Basics	In this Training, you learn how to achieve results in your communications with others and build collaborative relationships that emphasize trust and respect. Through interactive workshops, self-assessments, role-playing activities and video simulations, you gain practical experience initiating and responding to various forms of communication. You learn to handle situations based on a flexible,

Course Title	Course Description
	genuine and self-confident approach. Managers and professionals at all levels must rely upon sound communication for effective working relationships.
Emotional Intelligence	Emotional intelligence, also referred to as Emotional Quotient (EQ), is vital for successful leadership, career success, and overall effectiveness. With this training course, you gain the knowledge and skills to manage emotions, communicate intelligently, raise your EQ, apply EQ to understand yourself and others, and develop a plan for self-improvement. Training emotional intelligence could be the next step to boosting your career. Student Course Rating AveragesInstructor's knowledge of the subject matter: 10/10Instructor's presentation skills: 10/10Clarity of the training content: 10/10Relevance to real-world job situations: 10/10Effectiveness of the practices within each lesson to reinforce the knowledge and skills learned: 9.8/10 Student Quotes"While not the first training session I attended regarding emotional intelligence, I found it helpful. It gave me new insights and reminded me to take the time needed to foster this in my team.""Helpful and great insight for EI.""It gave me a good basis on the topic of EI & the resources needed to delve into it more in my own time."
Leadership & Influence Workshop	They say that leaders are born, not made. While it is true that some people are born leaders, some leaders are born in the midst of adversity. Often, simple people who have never had a leadership role will stand up and take the lead when a situation they care about requires it. A simple example is parenting. When a child arrives, many parents discover leadership abilities they never knew existed in order to guide and protect their offspring.
Leadership through a DEI&B Lens	Strong leaders are able to supervise and effectively manage their teams, but Diversity, Equity, Inclusion, and Belonging (DEI&B) is also critical to leadership development. Leaders that are able to understand difference, create access and opportunities, and help people cultivate a strong sense of belonging within an organization are able to lead their teams more effectively and benefit the organization as a whole. This leadership training combines innovative approaches to leadership development and team building with critical concepts and best practices related to integrating DEI&B into the structure of the organization and the way managers work effectively with their diverse teams.
Leading a Customer-Focused Team	Your product can be stellar, your staff can be super talented, but the one thing that customers are most likely to remember is their direct interaction with your employees. The secret sauce to great customer service and support is the people who deliver it.This webinar shows you how to coach your team to transform their mindset from a transactional one to a relational attitude which leads to enhanced customer connections and improved loyalty. Using the four "A's" of effective coaching, you'll discover how to take stock of your employees, take action to correct weaknesses, and boost their satisfaction and engagement across the board.You can have the best, most efficient and customer-friendly processes in the world, but they will fall apart if your team is not motivated, not happy, or doesn't work together well.The bottom line: this course reveals a proven method to create a consistent culture where teams take ownership and are held accountable for meeting and exceeding customer expectations
Leading G.R.E.A.T. Virtual Teams	Have you suddenly been parachuted into managing virtual employees?You're by no means alone!And while the technology is there to provide connectivity and enable work to get done, it doesn't necessarily mean you're naturally comfortable in the role of a virtual leader with the tools and techniques necessary to keep your employees present and effective in their work.Yet the research clearly shows that "effective leadership is the number one factor that influences success in a virtual organization."How virtual work gets done is different. Though you have the skills, you're now required to use them differently and in ways that are most effective when you and your people are working at a distance.Using the G.R.E.A.T. framework, this webinar walks you through a new approach to thinking, planning, and organizing using an array of hardware, software, apps, personal resilience and emotional intelligence. You'll learn how to lead in a virtual environment using components of Goals, Relationships, Empowerment, Agility, and Trust to guide you to success.

Course Title	Course Description
LGBTQ+ Best Practices	This training provides participants with a complete overview of respecting LGBTQ+ people in the workplace and communities. There are many aspects of terminology, stereotypes, political debates, and other challenging concepts that present barriers to allyship for this community. This training will unpack challenging terms, challenge misconceptions about the community, provide participants with applicable best practices, and help the organization create a respectful community for their LGBTQ+ employees and customers.
Meeting Management Workshop	This workshop is designed to give your participants the basic tools they need to initiate and manage their meetings. They will learn planning and leading techniques that will give them the confidence to run a meeting that will engage the attendees and leave a positive and lasting impression. Through this workshop, your participants will learn the needed skills in planning and implementing a successful meeting. The Meeting Management workshop will explore how to reduce waste and make meetings more efficient. This is a hands-on workshop and your participation will help make it a valuable experience. Use this time to begin the process of developing your skills along with other participants who share the same desire to improve their meeting management skills.
PMI Agile Certified Practitioner (PMI-ACP) Certification	Project managers' use of Agile has risen, increasing the demand for such expertise. Research suggests that using Agile methodologies decreases product defects, improves team productivity, and increases the delivery of business value. You can apply for the certification if you have experience working on agile project teams.
Project Management Professional (PMP) (With Exam Voucher)	The PMP acknowledges candidates skilled at managing the people, processes, and business priorities of professional projects. PMI, the world's leading authority on project management, created the PMP to recognize project managers who have proven they have project leadership experience and expertise in any way of working. PMP certification validates that you are highly skilled in: Motivating people and teams through all phases of a successful project. Using predictive, agile and hybrid approaches to determine which way of working is best for each project. Highlighting the success of a project and its impact on overall strategic organizational goals.
Project Management Professional (PMP) (Without Exam Voucher)	The PMP acknowledges candidates skilled at managing the people, processes, and business priorities of professional projects. PMI, the world's leading authority on project management, created the PMP to recognize project managers who have proven they have project leadership experience and expertise in any way of working. PMP certification validates that you are highly skilled in: Motivating people and teams through all phases of a successful project. Using predictive, agile and hybrid approaches to determine which way of working is best for each project. Highlighting the success of a project and its impact on overall strategic organizational goals.
Redefining Privilege & Allies, Accomplices, and Co-Conspirators	This training provides participants with an explanation and refining of their understanding of privilege. Privilege is a common DEI&B concept, but there are several very common misconceptions and negative connotations around privilege that are inaccurate. This training then transitions into best practices for using privilege to a strong and active ally for communities and issues that you want to support.
Situational Leadership	Leadership Overview Manager vs. Leader What Type Of Leader Am I? Situational Leadership Overview

Course Title	Course Description
	The Four Development Levels The Four Development Levels Understanding The Four Development Levels Terminology Employee Development Levels In Action The Four Leadership Styles The Four Leadership Styles Model Matching Leadership Styles To Development Levels Application Of Theory – Putting It All Together Using The Employee Development Template Theory Into Practice – Develop Your Plan
Squashing Workplace Negativity	Negativity can act like a viral illness that spreads throughout your team or organization. Left unchecked, these bad attitudes can reduce morale and engagement, adversely affect retention of your best employees and have a significant impact on productivity and the bottom line.As a manager or leader in your organization, you need to be able to recognize and diagnose negative behaviors early, before they take hold, so that you can take corrective action.To combat negativity, you need to be able to proactively inoculate your team against its dangers by creating the right type of workplace norms and climate. In this webinar, you'll get tactics and techniques to lead individuals or teams out of negative cycles and create positive cultures of personal accountability.
Stress & Anxiety Management	Positive and negative stress is a constant influence on all of our lives. The trick is to maximize the positive stress and to minimize the negative stress. Your participants will be shown how stress can be positive and negative, and we'll look at the Triple A approach that will form the basis of this workshop. The Stress Management workshop will give participants a three-option method for addressing any stressful situation, as well as a toolbox of personal skills, including using routines, relaxation techniques, and a stress log system. They will also understand what lifestyle elements they can change to reduce stress. Long-term unmanaged stress leads to burn out. We'll be talking about identifying the stress & how to relieve it before it gets to the burn-out phase but also what to do when you've identified you're in burn-out.
The Cognitive Enterprise: How AI and Big Data will Transform Business	Artificial intelligence and big data are creating significant business results, and your organization can't afford to be left behind.This isn't about robots or large numbers. Artificial intelligence is being used through machine learning and neural networks to both generate new revenues and lower costs across business functions, from operations to human resources and accounting to supply chains. These changes are being fueled by big data, the accumulation of information never seen before in human history.The future is now for these cutting-edge technologies, and it's time for you to start creating a strategy for how your business can realize the benefits of artificial intelligence and big data in both the short and long term.
The New Leadership Basics	In this course, leaders understand how to create clarity in their roles, understand the importance of vision, and acquire tools to be more persuasive. Effective leadership is key to strategic planning and objective completion for any team and organization, so learners will explore how these concepts work together. This course also includes leadership terminology, leadership styles, and the concept of leadership markers. Participants that complete this course will learn foundational leadership skills and be equipped to increase their leadership effectiveness in any role.
Time Management	Overwhelmed by all the demands on your time? Time is one commodity we cannot get back. Manage time more effectively and work more efficiently with practical strategies and options. Essential but often overlooked, skills to help you become more organized, work efficiently, increase productivity and save time. Improving time management is a core skill for anyone wishing to work efficiently and establish good habits. Implementing your action plan will help you reduce stress and enhance your productivity.
Unconscious Bias, Microaggressions, & Micro affirmations	This training provides participants with an opportunity to explore a very common DEI&B topic, Unconscious Bias, in a way that actively addresses the practical application uses of this knowledge in addition to learning the basic terminology. Also, participants will learn how to recognize bias in various forms, combat bias in different situations using proven methods, and implement strategies for promoting a culture of respect and inclusion.
